Chanhassen Interceptor Rehabilitation Project
Construction Update February 3, 2020
Issue 1

Please note: The construction timeline is subject to change pending weather conditions and ongoing coordination efforts with various contractors and agencies working in the project area.

Project Initiation

Work activity commenced the week of January 27th with crews performing preconstruction surveying and staking. Site 1 will be the focus of work over the next couple of months. Work on Site 2 along Lake Lucy Road is anticipated to start in March (update will be provided as timeframe approaches).

Activity Update – Site 1

Starting this week, crews will be bringing equipment and materials to the site in preparation for installation of the temporary conveyance system. Temporary traffic control will be installed on Galpin Boulevard near Wynsong Lane. Erosion control fencing will be installed along the project area.

Site preparation will continue on Site 1 over the next couple of weeks. A temporary access road will be built for the temporary conveyance pipe installation east of Galpin Boulevard. Crews will also begin to install the pump pit for the temporary conveyance system near Wynsong Lane.

You may experience short delays or flaggers present on Galpin Boulevard as crews are unloading equipment and materials to the site. Thank you for your patience and understanding during construction.
