Activities through May

Crews continue making improvements to the interior and exterior of the Coon Rapids lift station. Exterior work includes installing the roof, the concrete sidewalks around the building, and the outdoor HVAC equipment. Crews are also installing new pipes, the electrical and HVAC systems, and applying a corrosion resistant coating to the wet well (see example below).

What does a lift station do?
Watch this short video to learn the purpose of lift stations and how they transport wastewater from local sanitary sewer systems to regional wastewater treatment plants.

Other projects in the area

The City of Coon Rapids will begin their Coon Creek Bridge Restoration project on May 3. This project is located west of the MCES lift station (1055 Coon Rapids Boulevard Extension NW). The pedestrian/bike path will be temporarily closed while the City restores the Coon Creek Bridge. Work is anticipated to be completed in mid-June of this year.

For more information on this project, please contact the City of Coon Rapids’ Engineering Department at 763-767-6479. You can sign up for the City’s weekly construction updates on their engineering page by clicking the “Notify Me” icon.

Construction activities and schedules are subject to change due to weather and other unforeseen circumstances.
