Activities through August

Crews have completed work inside the lift station and have started going over the final check list to start testing systems before activating the lift station to handle flow. Testing is estimated to take approximately one month to complete. After the systems pass all the tests, the lift station will be activated, the temporary conveyance pipes will be removed, and the remaining restoration activities will be completed.

*Construction activities and schedules are subject to change due to weather and other unforeseen circumstances.*

---

**New odor control unit is installed outside the lift station**

**New pumps are installed inside the lift station**
