

Sewer Lining continues week of October 2

Crews have lined over two thirds of the south phase of the sanitary sewer along Wintergreen Street Northwest. Equipment set up will continue on Monday, October 2nd with the lining installation scheduled to begin on Tuesday, October 3rd.

Hydrant water will be used to expand and push the liner through the existing pipe. Once the liner is in place, a boiler truck will heat up the water to set the liner resin. For the liner to set properly, a boiler truck will be **continuously operating** through Thursday, October 5th. After the liner is set, the water will be cooled down and released into the sewer system on Friday, October 6th.

What to expect

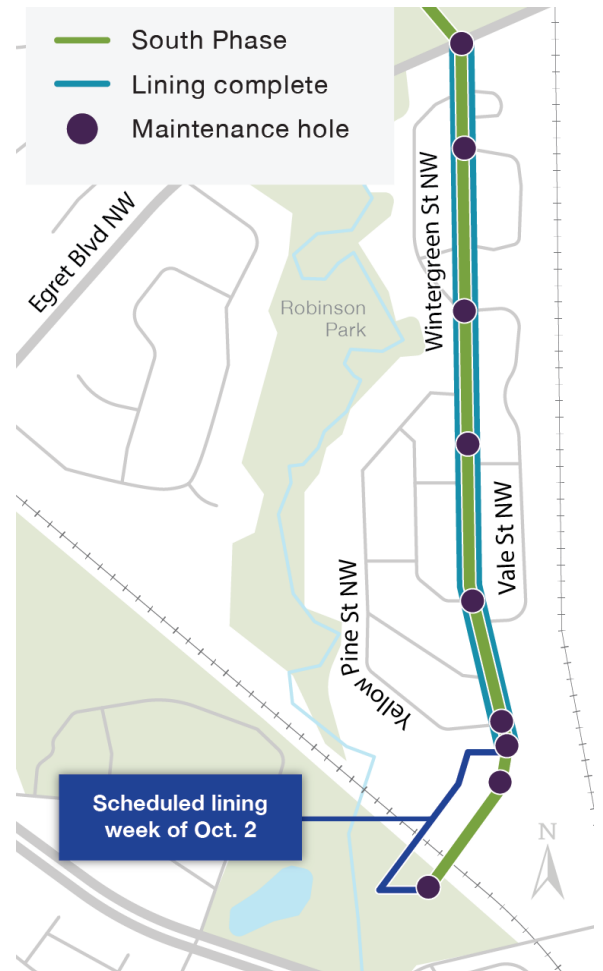

Expect noise and vibrations as crews work near you.

Expect some resin and sewer odor as crews work near you.

Access will be maintained during this stage of the project. Residents may have periodic short-term delays while crews are working through the area.

Construction activities and schedules are subject to change due to weather and other unforeseen circumstances.
