Corcoran Lift Station Project

About the project
The Metropolitan Council Environmental Services (MCES), operator of the metro-area wastewater collection and treatment system, is constructing a new sanitary sewer lift station in southeast Corcoran. Crews have begun preparing the site for construction to begin the week of July 9, and will be working on the lift station through summer 2019, weather permitting. The improvements include:

- **Lift station construction.** We will construct a new lift station near the intersection of Brockton Lane and Bass Lake Road (see project location map). The new lift station will extend the regional sanitary sewer system to serve homes and businesses in the city of Corcoran, while Maple Grove will continue to operate on separate MCES facilities.

- **Sewer pipe construction.** We will construct approximately 350 feet of new pipe to connect to the city’s sewer pipe to the north and MCES (Elm Creek interceptor) to the south.

Residents in the area may notice crews onsite as they begin preparing the land for construction of the new lift station. Preparation activities will include site grading, access road construction, installation of erosion control, utility and installation of a temporary wastewater pumping system.

What is a lift station?
This new lift station will pump wastewater into the Elm Creek interceptor system which conveys flow to the Metropolitan Wastewater Treatment Plant in Saint Paul. Due to the small size of the facility, no above-ground building is needed. The only visible structures will be the control panels and an emergency generator.

Stay in touch
Periodic notices will be posted to the project website and emailed out to keep you informed. To stay up to date on the progress of this project, please sign up for email updates at www.metrocouncil.org/sewerconstruction/corcoran. For information regarding other construction occurring in the area contact the cities of Maple Grove or Corcoran. If you have additional questions or concerns, please email us at info@corcoranliftstationproject.com or call the project hotline at 763-280-7111.

Thank you in advance for your patience and assistance as we work to construct the new lift station.

How will the project impact me?
While we do our best to minimize impacts during construction, some temporary inconveniences may occur as the work takes place, including:

- Minor lane closures on Bass Lake Rd
- Contractor equipment locations
- Lights
- Dust
- Noise and vibration
- Odors
