

Excelsior L20 Construction Project

Project Update - Feb. 5, 2024

- Beginning the week of February 19, the contractor, Minger, will begin mobilizing their equipment and materials to the site. They will set up for construction near Oak Street and Beehrle Avenue in preparation for work near lift station L19.
- The construction will require closing Beehrle Avenue to through traffic which will last for about 5-6 weeks. Signage will direct traffic safely around the closure. Local businesses will have access maintained.
- Work will also consist of a sewer connection in front of Collision & Color (140 Oak Street), which will require shifting traffic on Oak Street to accommodate the work.
- This work is part of an overall project to construct a new regional gravity sewer pipe in the City of Excelsior.
