

Construction Update – April 2023

Metropolitan Council Environmental Services (MCES) is renewing equipment and facilities at the existing Hastings Plant to keep the plant operating at a high level of service until a new proposed plant is built for the region.

The existing Hastings Wastewater Treatment Plant (WWTP) work includes:

- HVAC upgrades at 3 buildings (Chlorine, Influent, and Grit).
- Rehabilitation of two aeration tanks and removal of decommissioned spray water and air pipes.

POTENTIAL NOISE NOTICE – While upgrading HVAC equipment in April, we will be using a temporary heating source that may produce additional noise.

The proposed Hastings Plant location work includes:

- Site security fencing at 2445 Ravenna Trail in Hastings. This includes fencing and vehicle gates only at this site. The proposed new plant is being developed under another project.

PROGRESS UPDATE - 49% Complete

RECENTLY COMPLETED

- Through March 2023
 - Layout of site security fencing and gates.
 - Aeration tank work, including the removal of decommissioned spray and air lines.
 - New concrete pavement at the 2nd Street driveway for the Solids Loading Building.
 - Replacement of HVAC and EF in Influent Building

UPCOMING WORK

- April 2023
 - Site security fencing installation
 - Remove and replace HVAC units
 - Additional outside heating source for temporary HVAC (additional noise possible).
 - Commission new equipment in Influent Building

The wastewater treatment plant remains in full operation during the construction.
