

## Hastings WWTP Aeration and HVAC Renewal

### Construction Update – December 2022

Metropolitan Council Environmental Services (MCES) is renewing equipment and facilities at the existing Hastings Plant to keep the plant operating at a high level of service until a new proposed plant is built for the region.

#### The existing Hastings Wastewater Treatment Plant (WWTP) work includes:

- HVAC upgrades at 3 buildings (Chlorine, Influent, and Grit)
- Rehabilitation of two aeration tanks and removal of decommissioned spray water and air pipes

**POTENTIAL NOISE NOTICE** – While upgrading HVAC equipment in December and January, we will be using a temporary heating source that may produce additional noise.

#### The proposed Hastings Plant location work includes:

- Site security fencing at 2445 Ravenna Trail in Hastings. This includes fencing and vehicle gates only at this site. The proposed new plant is being developed under another project.

### PROGRESS UPDATE - 30% Complete

#### RECENTLY COMPLETED

- Through November 2022
  - Layout of site security fencing and gates.
  - Aeration tank work including the removal of decommissioned spray and air lines.
  - New concrete pavement at the 2<sup>nd</sup> Street driveway for the Solids Loading Building.

#### UPCOMING WORK

- December 2022
  - Site security fencing installation
  - Remove and replace HVAC units
  - Use additional outside heating source for temporary heat (additional noise possible)

**The wastewater treatment plant remains in full operation during the construction.**
