

Hopkins Area Sewer Improvements Project

April 8, 2020

Construction at the Hopkins lift station is complete

The new Hopkins Lift Station is now fully operational, and all major construction is complete. Due to the environmentally sensitive nature of the site, we will continue our turf establishment and wetland buffer restoration for a few more weeks. Once restoration is complete, MCES will maintain and monitor the new vegetation to protect the water quality of Minnehaha Creek.

Thank you for your cooperation and patience during construction. If you have any additional questions, please contact:

Tim O'Donnell, Citizen Liaison
Metropolitan Council Environmental Services
Phone: 651-602-1269
Email: SewerImprovements@metc.state.mn.us

Contact us with questions or concerns at any time during the project.
