

Orono Interceptor 7113 Relocation Project

Project Goals

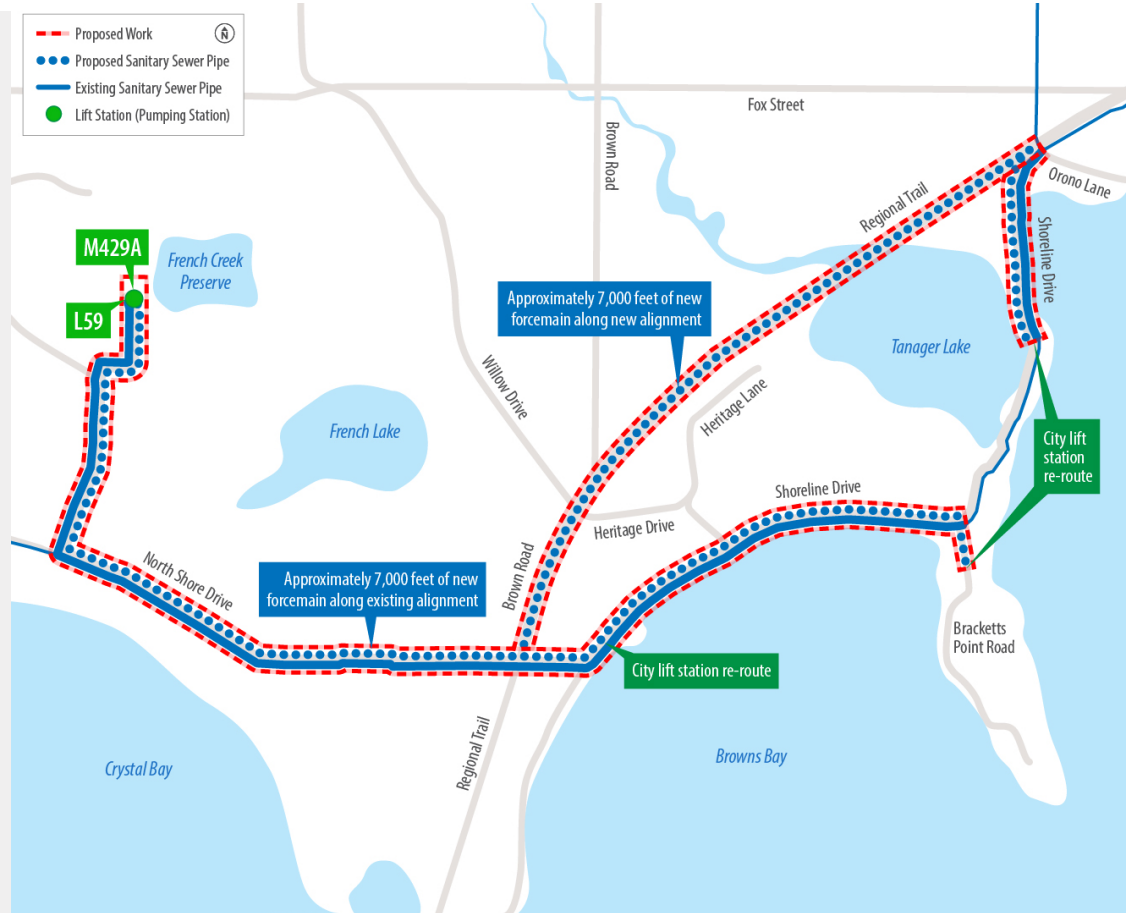

Improve efficiencies and system reliability

Reconstruct forcemain 7113 on a new alignment further away from Lake Minnetonka

Reconnect City facilities to new pipe

Construction Schedule

2020

Design

2022

2023

Construction

2025

\$14 Million

Key Terms:

Interceptor

The large underground pipes that make up the regional wastewater sewer system. These pipes can be either gravity pipes or forcemains.

Forcemain

A pipe that carries wastewater being pumped (or forced) uphill, as opposed to wastewater flowing by gravity.

Lift Station

Pumping stations or “Lift Stations” pump wastewater from low points in the local sanitary sewer system. Once “lifted”, wastewater flows by gravity through MCES’s regional pipes to a Metropolitan Council Regional Wastewater Treatment Plant. Pumping stations usually have an above-ground building to house mechanical, electrical, odor control and communications equipment.
