

Orono Lift Stations L46 and L49 Improvements

Project Goals

Improve efficiencies and system reliability

Condition-driven rehabilitation and replacement

Rehabilitation of Lift Station L46

Replacement of Lift Station L49 on new site

Reconstruct forcemain

Construction Schedule

2019*

Planning/Design

*Continuation of previous project

2021

2023

Construction

\$3.8 Million

2025

Key Terms:

Lift Station

Pumping stations or "Lift Stations" pump wastewater from low points in the local sanitary sewer system. Once "lifted", wastewater flows by gravity through MCES's regional pipes to a Metropolitan Council Regional Wastewater Treatment Plant. Pumping stations usually have an above-ground building to house mechanical, electrical, odor control and communications equipment.

Forcemain

A pipe that carries wastewater being pumped (or forced) uphill, as opposed to wastewater flowing by gravity.
