# Service Area and Facilities

## Wastewater Treatment Plant Locations and Service Areas

We serve ~50% of Minnesota's population

### WHO WE SERVE

7-county Twin Cities Metro Area

111 communities

3,000 square miles

2,700,000+ people

### OUR FACILITIES

9 wastewater treatment plants

640 miles of interceptors

61 lift stations (pumping stations)

250 million gallons per day (average)

# Project Scope

- Site: West of Old Hwy 8 to Long Lake Road along north side of the sound wall in Long Lake Park
- Existing structures will be rehabilitated using a process call CIPP (Cured in Place Pipe)

# Project Need & Benefits

- Issues:
  - Corrosion
  - Sag
- Benefits:
  - Less maintenance required
  - Reduced chance for sewage blockages
  - Increased system efficiency and reliability

# Construction Process

- Site preparation
- Installation of temporary flow conveyance system
- CIPP process
  - One section at a time, manhole to manhole
- Site restoration

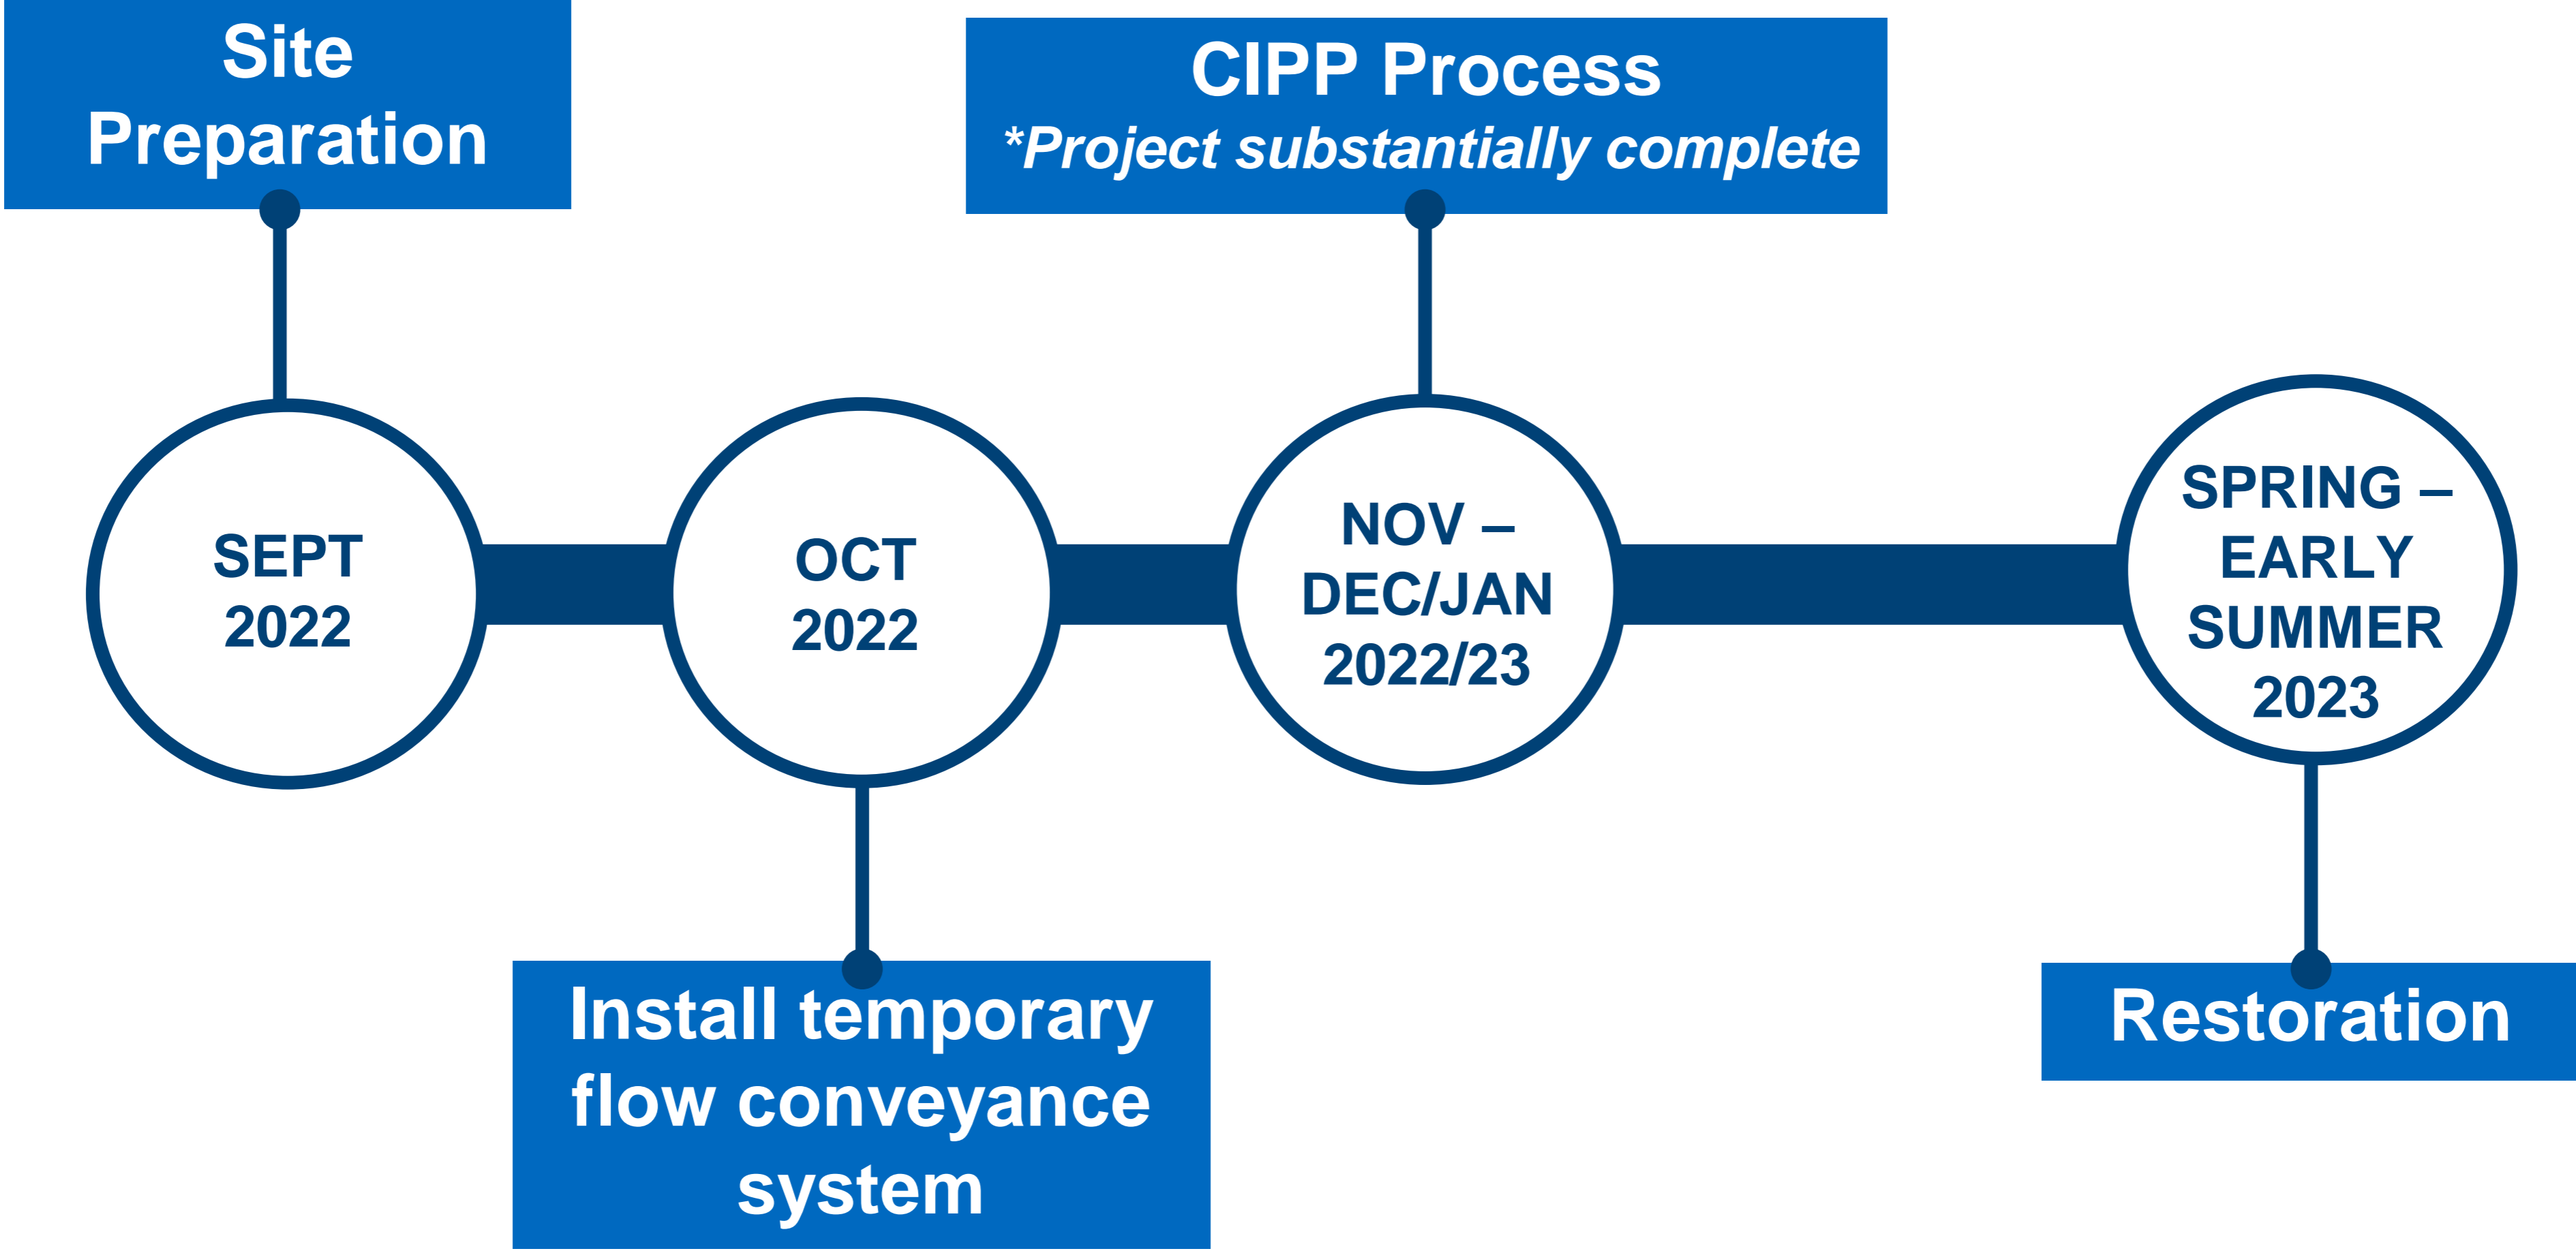

# Construction Impacts

- Reduced parking at Long Lake lot
  - Boat launch access always maintained
- Temporary trail closures
- Disturbed turf
  - Areas will be restored
- During CIPP process:
  - Noise from engines
  - Smells from sewer
  - Potential overnight work

# Anticipated Construction Timeline\*

*\*All dates are weather dependent and subject to change.*

# How to participate in Q&A:

Use the “Q&A” box to type in questions and comments

Select the reactions button to use the raise hand function to be unmuted and speak aloud

# Stay Informed

## Share questions and comments
