ESE2 Built-Up Roof Construction

ESE2 Built-Up Roof Construction

ESE2 Roof Construction Complete

|| RECENT COMPLETED WORK

- The four tunnel access buildings, WSE3, CL2, Pump and Blower, and ESE2 roof replacements are now complete.

|| WORK IN PROGRESS

- There are a few items related to railing, ladder access, and HVAC units remaining on the ESE2 roof replacement.

|| UPCOMING WORK

- Maintenance will be replacing the ladder on the ESE2 roof.
- The Contractor has the following work remaining on the ESE2 roof:
 - Install permanent railing
 - Install flashing around louvered intakes
 - Insulate supply and return ductwork for air handling unit
 - Insulate steam and condensate lines, replace damaged condensate piping, and insulate drain piping for air handling unit.
- Final punch list items on all roofs.
