Full closure begins Monday, January 24

Rolling closures of 38th Street expected between 26th and Hiawatha Avenues

The Metropolitan Council Environmental Services (MCES) continue making repairs on the sanitary sewer tunnel along 38th Street between 26th Avenue and West River Parkway.

Starting Monday, January 24, 38th Street will close at 26th Avenue to the alley between 26th and 25th Avenues. This closure is expected to remain in place for approximately one week.

Rolling closures will continue moving east. Here’s what you can expect in the coming weeks on 38th Street:

- 28th Avenue to the alley between 28th and 27th Avenues will close for approximately one week starting in late January.
- 30th Avenue to the alley between 30th and 29th Avenues will close for approximately one week starting in early February.

Work will be phased so that no two consecutive blocks are closed at the same time. The schedule is weather dependent and subject to change.

These closures are necessary for crews to begin concrete repairs of the underground pipe. Please keep the following in mind during this phase of work:

- Concrete trucks will be hauling to and from 38th Street.
- Through traffic will be detoured to use Hiawatha Avenue, 35th Street, 23rd Avenue.
- Parking will not be permitted in the work areas.

Residents and businesses on the east side of Hiawatha Avenue should anticipate rolling closures to begin in mid-February. Additional details to follow in the next update.

Metro Transit Bus Detours

Metro Transit buses will detour around the closure areas as part of Metropolitan Council Environmental Services (MCES) construction project at 38th Street.

During the 38th Street closure between 26th and 25th Avenues, Metro Transit buses will use 26th Avenue, 39th Street, 25th Avenue and 37th Street to detour around the closures. No parking signs will be posted on one side of the block while Metro Transit buses use these routes during the work.

For more information on bus routes and notifications about bus stop or route changes, visit metrotransit.org/rider-alerts.
