

# MEI Rehabilitation

March 21, 2023

## Marshall Street opens Tuesday, March 21

Crews have finished lining the sewer structures under Marshall Street. Restoration of the Marshall Street and 22nd Avenue intersection in Minneapolis is almost completed. Marshall Street is anticipated to open to traffic by **6 pm Tuesday, March 21**. Residents may see crews working on additional site cleanup and other miscellaneous activities through the end of the week. Crews will be back later this year to restore the temporarily patched sidewalks to a more permanent condition.

*Construction activities and schedules are subject to change due to weather and other unforeseen circumstances.*

## Otis Avenue & Pelham Boulevard

Crews continue to work intermittently inside the sewer structure near Otis Avenue and Pelham Boulevard in St Paul. This work will continue through the summer. No traffic impacts are expected, but residents may experience additional odors during working hours.
