

# 4th Street Tunnel Repair Project

Metropolitan Council Environmental Services (MCES) completed the tunnel access shafts and necessary repairs to the existing sewer tunnel beneath 4th Street in downtown Minneapolis in June 2020. The improvements included installation of two new access shafts beneath 4th Street, removal of debris in the void space above the tunnel, repairing the damage to the sewer tunnel and filling the void with grout. MCES will use the new access shafts to conduct routine inspections of the existing sewer tunnel.

**Thank you for your cooperation and patience during construction.**

**Project  
completion  
notice**

The graphic features the text 'Project completion notice' in a bold green font, centered within a white square that has a thick black border. To the right and slightly below the bottom-right corner of the square is a large, solid green checkmark.
