

## Weekend work begins Saturday, June 11

Crews will be cleaning the large diameter sewer pipes from the north side of Godfrey Parkway to the Minnehaha roundabout and down to the E 50th Street and Hiawatha Avenue intersection. This work will require crews to work at multiple locations and they will move from site to site as needed. **Crews will be working Saturdays from 7 a.m. to 3:30 p.m. starting June 11.** This work is estimated to be completed at the end of August, but is dependent on weather and other factors, like how much debris is in the sewer pipes.

### Cleaning process

To clean the large diameter sewer pipes, one crew will use special equipment to send a water jet through the pipes and another crew will be set up to haul debris and material to licensed landfills (see photo to the right).

We will continue to do our best to mitigate noise and odors, but you will temporarily experience more noise and odors than usual while crews clean the sewer structures and pipes.

### Safety reminder

Trail users, for your safety, please remember to follow any posted detour signs and do not cross the fenced off areas.

*Construction activities and schedules are subject to change due to weather and other unforeseen circumstances.*
