Halstead Bay Bridge reopens, CR 44 closes farther south by 6 p.m. today

CR 44 will reopen to local traffic at the Halstead Bay Bridge by 6 p.m. today and close to all traffic between Trillium Ln and Shady Ln for crews to continue rebuilding the road and continue underground utility work (more schedule information below).

Activities for the week of June 17

- **Westedge Blvd/CR 44 between Halstead Ln and Sinclair Rd:**
  - Crews will continue prepping, seeding, and watering areas between Bartlett Blvd/CR 110 and Sinclair Rd.

- **CR 44 at Halstead Bay Bridge:**
  - Traffic will be shifted to the east between Eagle Bluff Rd and just north of the bridge to allow crews to finish the pipe work under the channel.
  - **Reminder:** CR 44 will close again for crews to complete pipe work and connections between Eagle Bluff Rd and Sinclair Rd later this year.

- **CR 44 between Halstead Bay Bridge and Shady Ln:**
  - Crews continue rebuilding the road between Trillium Ln and Shady Ln. It will reopen with a gravel surface to local traffic later this month/early July.
  - Crews continue setting up temporary aboveground wastewater conveyance pipes.
  - Short-term road restrictions will occur at the entrance to Loring Dr while crews bury the temporary pipe underneath the road. Residents will receive notification in advance, and staff on site will help coordinate access.

- **Lake Minnetonka Regional Park:**
  - Crews will be in the park periodically to water the recently seeded areas.

- **Along Hwy 7 between Merrywood Ln and Virginia Dr:**
  - Pipe lining and rehabilitation continues and is anticipated to be completed by the end of the month.

If you live in the area and need to drive by locations where crews are working, be aware that there may be lane shifts or lane closures. During lane closures, flaggers will direct traffic around the work for one direction at a time as needed.

For your safety, the safety of neighborhood residents and our workers, please slow down and allow extra travel time around the area.

*Construction activities are subject to change due to weather, schedule, and unforeseen impacts.*
