Due to the recent and upcoming rainy weather expected before July 4, crews may start work at 6 a.m. and work this Saturday. This is to help us stay on schedule and ensure that local access routes for residents around the closed areas are cleaned up nicely before the holiday.

**Activities for the week of July 1**

- **Westedge Blvd/CR 44 between Halstead Ln and Sinclair Rd:**
  - Crews continue prepping, seeding, and watering areas along the boulevard.

- **CR 44 at Halstead Bay Bridge:**
  - Crews continue working on connections to the pipe under the channel, in preparation for the final connections to new sewer pipe under CR 44 later this year.

- **CR 44 between Halstead Bay Bridge and Shady Ln:**
  - CR 44 is closed to traffic between Maple Forest and Shady Ln. Residents have been notified of temporary access routes.
  - Crews continue installing underground utility pipes between Maple Forest and Stonebridge Rd. Access will change as crews move north; please remember to check the directional signs at your neighborhood entrances.
  - Crews also continue rebuilding the road between Stonebridge Rd and Shady Ln and will move north following the underground pipe installation crew.

- **Along Hwy 7 between Merrywood Ln and Virginia Dr:**
  - Pipe lining and rehabilitation is wrapping up and crews will begin site cleanup activities.

- **Speed limit reduced on Westedge Blvd/CR 44:**
  - The signs for the temporarily reduced speed limits have been delayed but they should be installed soon. Reminder that the posted speed limit varies by location, so please pay attention to the signs.

If you live in the area and need to drive by locations where crews are working, be aware that there may be lane shifts or lane closures. During lane closures, flaggers will direct traffic around the work for one direction at a time as needed.

For your safety, the safety of neighborhood residents and our workers, please slow down and allow extra travel time around the area.

*Construction activities are subject to change due to weather, schedule, and unforeseen impacts.*
