

MOUND SANITARY SEWER REPLACEMENT UPDATE

BARTLETT BLVD. TO SHORELINE DRIVE ONE-DAY CLOSURE OCTOBER 15

Access to Shoreline Drive from Bartlett Blvd. will be temporarily impacted by sewer construction on Tuesday, October 15.

Bartlett Blvd. will be closed just south of the intersection for one day as crews work on the water main. Driveway access will not be impacted, and Shoreline Drive will remain open to traffic in both directions.

Drivers should use alternate routes to access Shoreline Drive. The closure is expected to last from 7 a.m. to 7 p.m.

DAKOTA RAIL TRAIL NOW OPEN

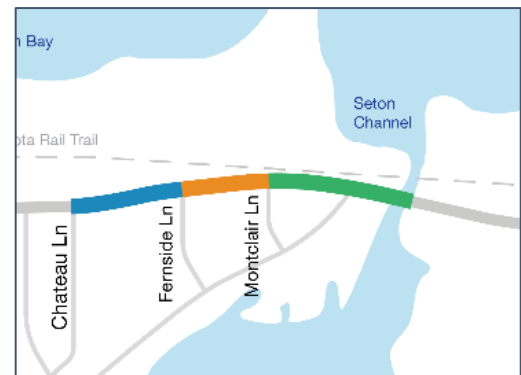

Crews finished repaving the Dakota Rail Regional Trail near Seton Channel this week. The trail is now back open for use. Thank you for your patience during the closure and detour.

SITE TWO PIPE REPLACEMENT ONGOING

Crews have started drilling and installing the new sanitary sewer pipe between Chateau Lane and Seton Channel. Construction is expected to last throughout October and will take place in the following sections along Shoreline Drive:

- Seton Channel to Montclair Lane
- Montclair Lane to Fernside Lane
- Fernside Lane to Chateau Lane

During the week of October 14, crews will continue working on the section between Seton Channel and Montclair Lane and may begin work between Montclair and Fernside lanes.

Project site two map showing the phases that will be used for pipe replacement.

Properties along the south side of Shoreline Drive will experience short-term access changes turning in and out of their driveways. For most sections, a one-way local access lane will be created between the curb and the pipe. Residents will generally only be able to enter and exit their properties from the east, but specific access may vary each week. Crews will work with property owners to ensure they can access Shoreline Drive.

CONSTRUCTION IMPACTS

People who live or work near the project area may experience some disruptions during drilling, including noise, vibration, odor and dust, contractor equipment, lights, 24-hour pumps, and periodic overnight work.

Aboveground temporary wastewater conveyance pipes will be installed along Shoreline Drive beginning the week of October 14 to ensure there are no disruptions to sewer service. These pipes reroute sewer flow around the work site. Diesel pumps with noise dampening equipment (low noise) will run 24 hours a day as part of the system.
