

St. Croix Trail is now open

Crews completed activities south of 56th Street N, have reopened the St. Croix Trail, and removed the temporary lane configurations on Pickett Avenue N.

Activities through July

Crews installing the new sanitary line north of 56th Street N are nearing completion. Once these new pipes have passed testing, we will remove the temporary aboveground wastewater conveyance system and begin site restoration activities.

St. Croix Trail is now open south of 56th Street N

Once crews complete landscape restoration, most on-site activities will be wrapped up in July and there will be minimal activity by work crews. Later this summer, crews will resume work on a meter structure near Highway 95 after the materials and parts for the work are delivered to the site. This work will include replacing the electrical service to the meter site, removal and replacement of meter components, and other miscellaneous activities.

Construction activities and schedules are subject to change due to weather and other unforeseen circumstances.
