

# Vadnais Heights Area Regional Sewer Improvements Project

## June 8, 2018 CONSTRUCTION UPDATE

(dates are approximate and dependent on weather/construction conditions)

### Ongoing Construction

#### Work Near Highway 36 & Highway 61

Crews continue working on both sides of Spoon Lake, north of Hwy 36. Sewer rehabilitation work on the west side of Hwy 61 and on the north side of Hwy 36 near Keller Regional Park is complete. However, crews will continue to be on-site and equipment will remain in place until other construction activities and park restoration is complete.

**The park remains open during construction.**

#### Work Near Highway 61 & I-694

Crews finished testing the temporary conveyance system last week. The pipe is east of Hwy 61, both north and south of I-694. The pumps are now in operation and will be used to convey wastewater during the pipe rehabilitation work in the area.

*Reminder:* There will be temporary conveyance along the pedestrian bridge over I-694. **The Bruce Vento Trail will remain open during this time.**

### Upcoming Construction

The sewer lining process on the north side of I-694 will begin next week and continue through June. After work on the north side is complete, crews will switch to the south side of I-694. While we do our best to minimize impacts during construction, some temporary inconveniences such as odors, noise, and vibrations may occur as this work takes place.

### Traffic Impacts

Sometime during the week of June 18, crews will need to shift the westbound lane of traffic on County Rd. B. near the Frontage Rd. During this time, drivers will make left turns onto southbound Hwy 61 from the thru lane.

### Safety

Please keep your distance from any materials and equipment, especially our temporary conveyance pipes. Only authorized personnel are permitted in our work areas. We want you and our crews to stay safe during construction.

### About the Project

Metropolitan Council Environmental Services (MCES), operator of the metro-area wastewater collection and treatment system, is continuing construction on its Vadnais Heights Area Regional Sewer Improvements Project. This project will include making improvements to aging and deteriorating regional sanitary sewer facilities that serve the cities of Vadnais Heights, Maplewood, and White Bear Lake. The project is anticipated to be completed by fall 2019.
