

Vadnais Heights Area Regional Sewer Improvements Project

May 11, 2018 CONSTRUCTION UPDATE

(dates are approximate and dependent on weather/construction conditions)

Ongoing Construction

Work Near Highway 36 & Highway 61

Crews continue working on manhole repairs along Cope Ave. (frontage road near Menards). Lining work is anticipated to wrap up by mid to late May.

Sewer rehabilitation work on the west side of Hwy 61 and on the north side of Hwy 36 near Keller Regional Park is complete. Crews will continue to be on-site and equipment will remain in place to finish other construction activities and park restoration. **The park remains open during construction.**

Upcoming Construction

Work Near Highway 61 & I-694

Crews continue installing the temporary conveyance pipe east of Hwy 61 and both north and south of I-694. There will be temporary conveyance along the pedestrian bridge over I-694. **The Bruce Vento Trail will remain open during this time.**

Construction activities will begin later this month after crews finish setting up the temporary conveyance system in the area.

While we do our best to minimize impacts during construction, some temporary inconveniences such as odors, noise, and vibrations may occur as this work takes place.

Safety

Please also keep your distance from any materials and equipment – only authorized personnel are permitted in our work areas. We want you and our crews to stay safe during construction.

About the Project

Metropolitan Council Environmental Services (MCES), operator of the metro-area wastewater collection and treatment system, is continuing construction on its Vadnais Heights Area Regional Sewer Improvements Project. This project will include making improvements to aging and deteriorating regional sanitary sewer facilities that serve the cities of Vadnais Heights, Maplewood, and White Bear Lake. The project is anticipated to be completed by fall 2019.
