

# Waconia Interceptor 7508 Improvements

MCES Project No. 808320

## Project Overview:

Originally constructed in 1975, this 1.7-mile-long segment of Interceptor 7508 is being replaced due to age and to provide future capacity. This is one of the remaining sections of forcemain to be replaced as part of a program for the interceptor and lift station that serve the City of Waconia, Laketown Township, and the City of Victoria. The new segment will be constructed as a 20-inch forcemain to parallel the existing 16-inch forcemain. Work has been planned with the City of Waconia and Carver County who have concurrent utility and park improvement projects.

## Project Location:

The project is in Lake Waconia Regional Park and Highway 5 right-of-way in the City of Waconia and Laketown Township.

## Project Website

[metrocouncil.org/sewerconstruction/WaconiaInterceptor7508](http://metrocouncil.org/sewerconstruction/WaconiaInterceptor7508)

## Construction Schedule

Fall 2019 – Fall 2020

## Construction Cost

\$5 million

## Construction Impacts

- Disruption of Lake Waconia Regional Park
- Minor traffic impacts. Highway 5 detours or closures are not planned.
- Impacts have been reduced by Carver County, Waconia, and MCES planning their projects together.

## Key Stakeholders

City of Waconia  
Carver County  
Minnehaha Creek Watershed District
