

Work begins at the tailhouse and headhouse structures

Crews have completed modifications to the West Meters Odor Control Facility and are now preparing to complete work at the tailhouse and headhouse structures (see map below). Crews will be hauling in equipment and materials in mid-August. This work is currently anticipated to be completed in September.

Traffic and Trail impacts

While work occurs at the tailhouse structure:

- Drivers should expect periodic temporary traffic lane shifts on Mississippi River Boulevard.
- Trail users will be detoured around the work zone to the shoulder of Mississippi River Boulevard.
- Travelers should watch for crews and equipment in the area.
- There will be no impacts to traffic or trails when work occurs at the headhouse structure.

Construction activities are subject to change due to weather and other unforeseen impacts.
