Construction at two excavation sites underway

The Metropolitan Council Environmental Services (MCES) is currently making repairs on the sanitary sewer tunnel that runs under Woodbury Drive, between Lake Road and Atlas Trail.

Crews are currently working at two locations:

- The southbound lanes on Woodbury Drive, south of the Bailey Road roundabout
  - Southbound traffic on Woodbury Drive is reduced to one lane at this location; southbound traffic is still open
  - Construction at this location is expected to continue through spring

- The eastbound lanes on Atlas Trail, just west of Woodbury Drive
  - Atlas Trail is reduced to a single lane in each direction at this location
  - Construction and traffic control is expected to remain the same at this location through the summer

Contact us with questions or concerns at any time during the project.
