

## Construction progresses to new excavation sites along Woodbury Drive

The Metropolitan Council Environmental Services (MCES) continues to make repairs on the sanitary sewer tunnel that runs near the southbound driving lanes of Woodbury Drive.

Beginning on Tuesday, June 1, crews will mobilize and begin site excavation near the southbound trail of Woodbury Drive at the following locations:

- South of the Lake Road roundabout
- Near Antrim Road
- South of Antrim Road
- Near Raleigh Road

Information on potential traffic or trail impacts will be provided in the coming weeks once details are known. Construction and traffic control is expected to remain the same at these locations through the summer.

As a reminder construction on the eastbound lanes of Atlas Trail, just west of Woodbury Drive will continue through the duration of the project.
