Next, answer question 1 (question below the blue table) to update the facility mailing address. If you select “Yes” for changes, additional fields will be displayed. The required fields are denoted with a red asterisk (*).

Step 2: Report Summary

Report Summary

★ 2. Total days of operation during this reporting period:

★ 3. Average number of employees during this reporting period:

Answer questions 2 and 3 for the reporting period listed in the grey header.

2. Each calendar day with typical or greater than typical discharge activities, as allowed under this Permit, shall be considered one operating day. All other days shall be calculated as an appropriate fraction of one operating day.
3. Enter the average number of full-time employees working at the facility during the reporting period. Include office personnel and count two- (2) part-time employees as one- (1) full-time employee. Drivers, sales people, or other personnel who spend approximately ½ their time away from the office should be considered part-time employees. Round up to the nearest whole number.

Step 3: Volume Determinations for this Reporting Period

The volume determination is split into three sections:

- A) Incoming water sources
- B) Water not discharged to the sanitary sewer
- C) Wastewater discharged to the sanitary sewer

All volumes must be listed in gallons. To convert volume data from cubic feet to gallons, multiply the number in cubic feet by 7.48. Note that the difference between the “A Total” and the “B Total” must equal the “C Total.” However, volume determinations should follow the instructions listed in Section B.1.iii of the Industrial Discharge Permit.

A) Incoming Water Sources:

1. Enter volumes for all applicable water source categories that enter the facility during the reporting period.
2. Select the appropriate determination method from the drop-down menu.
3. Add in comments about the determination method or the volume itself. In some instances comments will be a required field.
4. Click on the calculate button at the bottom of the section. A value for the total incoming water sources will appear as a “read-only” field. If you make any changes to the volume in the rows above you must click on the calculate button again to update the total volume.

A. Incoming water sources:

	Volume in Gallons	Determination method	★ Comments
City Water Supply	<input type="text" value="139000"/>	Water Bills <input type="button" value="v"/>	<input type="text"/>
On-Site Well(s)	<input type="text"/>	<input type="button" value="v"/>	<input type="text"/>
Other	<input type="text"/>	<input type="button" value="v"/>	<input type="text"/>
Total	<input type="text" value="139000"/>		<input type="button" value="Calculate"/>

B) Water not discharged to the sanitary sewer:

1. Enter the volumes for all applicable categories of water and/or wastewater that leave the facility by methods other than the sanitary sewer during the reporting period.
2. Select the appropriate determination method from the drop-down menu.
3. Add in comments about the determination method or the volume itself. In some instances comments will be a required field.
4. Click on the calculate button at the bottom of the section. A value for the total volume of water not discharged to the sanitary sewer will appear as a “read-only” field. If you make any changes to the volume in the rows above you must click on the calculate button again to update the total volume.

B. Water not discharged to sanitary sewer(Deduct):

	Volume in gallons	Determination method	★ Comments
Used in Product	<input type="text" value="19,000"/>	Meter Readings <input type="button" value="v"/>	<input type="text"/>
Off-Site Treatment	<input type="text"/>	<input type="button" value="v"/>	<input type="text"/>

Other	<input type="text"/>	<input type="button" value="v"/>	<input type="text"/>
Total	<input type="text" value="19000"/>		<input type="button" value="Calculate"/>

C) Wastewater discharged to the sanitary sewer:

1. Enter the volumes for all applicable categories of water and/or wastewater that leave the facility through discharge to the sanitary sewer during the reporting period.
2. Select the appropriate determination method from the drop-down menu.
3. Add in comments about the determination method or the volume itself. In some instances comments will be required field.
4. Click on the calculate button at the bottom of the section. A value for the total volume discharged to the sanitary sewer will appear as a “read-only” field. If you make any changes to the volume in the rows above you must click on the calculate button again to update the total volume.

Note: Unless metered separately (or noted differently in the Industrial Discharge Permit), the “Domestic Waste” volume may be calculated by assuming a generation rate of 20 gallons per day per full-time employee per operating day (i.e., (20) x (# of employees listed in #3 above) x (# operating days listed in #2 above)). In certain situations, “Industrial Waste” may be determined by subtracting from “A Total” minus “B Total” minus all other categories in “C.”

C. Wastewater discharged to sanitary sewer(Sewered):			
Volume in gallons	Determination method	*	Comments
Non-contact Cooling Water	<input type="text"/>	<input type="text"/>	<input type="text"/>

Application Revision

★ Reason for Revision: 

Request for Revision

From the “**Submittal**” tab, under **Application Revision** click in the “**Reason for Revision**” box and provide an explanation for the revision. Click the blue button **Request for Revision**. This will send an email message to MCES.

MCES will review the request and send the User an email message approving or denying the request.

If the request is approved:

- log into the MCES Industrial Online Reporting System
- hover the cursor over the “Submittal” tab and click on the “Edit Pending Submittals”
- search for the submittal with the status of “Revision” and click on the Edit button
- make the change and resubmit the report

Note – an identical submittal will open containing all the information that was previously sent. You will not need to start over with the form. You can simply make the changes needed, save the changes, and resubmit by stepping through the validation and submittal steps.
