**Proposed Action**
That the Metropolitan Council authorize its Regional Administrator to award and execute contract 22P297A with Polydyne, Inc., to provide polymer to the Seneca Wastewater Treatment Plant in an amount not to exceed $7,048,000.

**Background**
Polymer is a conditioning chemical, which aids in the removal of water while processing sludge solids on mechanical equipment such as centrifuges and belt presses.

This procurement followed a two-step process. An Invitation for Prequalification was issued on January 9, 2023. The purpose of this solicitation is to identify the most effective polymer through a full-scale evaluation of their performance and prequalify those vendors. Only vendors that are prequalified are allowed to participate in the Invitation for Bids which is the second step in the procurement process.

Three vendors performed full-scale performance tests with a total of eight polymer products. After the full-scale testing, two vendors and four polymer products prequalified to participate in the Invitation for Bids.

The Invitation for Bids was issued on September 6, 2023. There were eight registered planholders, six suppliers, two plan rooms, and two planholders identified as minority, woman, veteran, small, or disadvantaged business enterprises. On September 28, 2023, a public bid opening was facilitated, and one bid was received. Procurement staff did not find any indication that the Council’s specifications were restrictive and determined there was adequate competition for this project. Polydyne Inc. was determined to be the low, responsive, responsible bidder and is being recommended for award.

Polymer unit costs ranged from $56.04 to $70.27 per dry ton of sludge processed. This contract will provide polymer at a unit price of $1.66 per pound for a period of two years with an option to extend for three additional one-year periods. Estimated expenditures are $1,210,000 annually and up to $7,048,000 over a five-year period with price adjustments based on the Producer Price Index for Plastic Material and Resins Manufacturing.
**Rationale**
The execution of a professional service, goods contract exceeding $500,000 requires Council approval.

**Thrive Lens Analysis**
This action advances the Thrive outcome of stewardship. Public financial resources will be invested efficiently and effectively to maintain proper operation of the Metropolitan Disposal System which protects the region’s natural resources.

**Funding**
Funds are available in the treatment plant operating budget.

**Small Business Inclusion**
The Office of Equity and Equal Opportunity (OEEO) thoroughly reviewed this procurement for Metropolitan Council Underutilized Business (MCUB) opportunities in accordance with federal and state laws and regulations as well as contract specifications. Upon conclusion of OEEO’s research and analysis, no MCUB goal was set.
