The preparation of this document has been funded in part by the U.S. Department of Transportation, Federal Highway Administration and Federal Transit Administration. The contents of this document reflect the views of the Metropolitan Planning Organization (MPO), which is responsible for the facts or accuracy of the data presented herein. The contents do not necessarily reflect the official views of the U.S. Department of Transportation. The report does not constitute a standard, specification or regulation.

2026 - 2029 TRANSPORTATION IMPROVEMENT PROGRAM

SUMMARY

The Metropolitan Council, which serves as the Metropolitan Planning Organization for the Twin Cities Metropolitan Area, is required by federal law to produce a four-year Transportation Improvement Program (TIP) that outlines funded highway, transit, bicycle, and pedestrian projects within the metropolitan planning area. The 2026 through 2029 TIP responds to procedures required by the Infrastructure Investment and Jobs Act (IIJA) and the United States Code of Federal Regulations (23 CFR 450.326). The legislation requires that all transportation projects that are either wholly or partially funded with federal monies as well as regionally significant local- and state-funded projects within the metropolitan planning area (Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington counties plus the contiguous urbanized areas¹ in parts of Sherburne and Wright Counties) be included in the region's TIP. The TIP must be consistent with the projections of federal funds and local matching funds for this time period.

The 2026-2029 TIP for the Twin Cities Metropolitan Area includes highway, freight, transit, bicycle, and pedestrian projects valued at approximately \$6.7 billion. Highlights of the TIP include the following:

- Approximately 46% of the total spending shown in the TIP is from federal sources, with 14% from state sources and 40% from local/other sources.
- The program includes \$2.8 billion (41%) for transit, \$3.2 billion (47%) for highways/roads, \$248 million (4%) for non-motorized transportation, and \$571 million (9%) for travel demand management, other projects, and yet-to-be-programmed set-aside funds.
- One major project is included in the TIP for the first time. (see project 2 on Table 20).

The Transportation Advisory Board (TAB) to the Metropolitan Council hosts a public comment period on the TIP prior to adoption. Notice of the public comment period is printed in the Minneapolis Star Tribune newspaper and emailed to groups representing a broad set of stakeholders. The notifications and process are carried out consistent with the Council's Public Participation Plan. A "virtual" public meeting will be held on June 17, 2025. The TAB will consider comments received on the draft TIP prior to final adoption of the TIP.

The 2026-2029 TIP implements, and is consistent with, the region's metropolitan transportation plan (MTP), titled the Transportation Policy Plan (TPP), adopted by the Metropolitan Council on February 12, 2025². The presence of a specific project in the TIP does not imply an endorsement of the specific design alternative or engineering details. Listing in the TIP is a funding commitment that assumes the project's development process has addressed all local, state, and federal requirements.

The draft 2026-2029 TIP is fiscally constrained, is consistent with the TPP, and its development process provides acceptable opportunity for public involvement.

¹ For definitions, see [Highway Functional Classification Concepts, Criteria and Procedures, 2013 Edition](#), U.S. Department of Transportation Federal Highway Administration

² Some projects in the 2026-2029 TIP were selected under processes developed under previously adopted versions of the Transportation Policy Plan, but they have been reviewed for consistency with the latest TPP regardless.

1. INTRODUCTION

The 2026-2029 Transportation Improvement Program (TIP) for the Twin Cities Metropolitan Area (shown in Figure 1, including parts of Wright and Sherburne counties) is the multimodal program of highway, transit, bicycle, and pedestrian projects and programs proposed for federal funding throughout the metropolitan planning area over the four-year period. The TIP is prepared by the Metropolitan Council and its Transportation Advisory Board (TAB) in cooperation with the Minnesota Department of Transportation (MnDOT). The projects listed in the TIP are consistent with and implement the region's transportation plan and priorities.

Federal Requirements and Regional Planning Process

Federal regulations require that a Transportation Improvement Program:

- Be developed and updated at least every four years.
 - If updated more frequently, the cycle must be compatible with the State Transportation Improvement Program (STIP) development and approval process.
- Cover a period of at least four years.
- Provide all interested parties with a reasonable opportunity to comment.
- Include federally funded capital and non-capital surface transportation projects (or phases of projects) within the boundaries of the metropolitan planning area proposed for funding.
- Include all regionally significant projects requiring an action by the FHWA or the FTA whether or not the projects are to be funded federally.
- Include, for each project phase: sufficient descriptive material; estimated total project cost; federal funding amount during each year (for the first year, this includes the proposed category of Federal funds and source(s) of non-Federal funds. For the second, third, and fourth years, this includes the likely category or possible categories of Federal funds and sources of non-Federal funds); and responsible agencies.
- Identify transportation improvements proposed in the region's metropolitan transportation plan (MTP, titled the Transportation Policy Plan) and recommended for federal funding during the program period.
- Demonstrate fiscal constraint, which means that total project costs and anticipated revenues balance, and include a financial plan that demonstrates how the approved TIP can be implemented, indicates resources from public and private sources that are reasonably expected to be made available to carry out the TIP, and recommends any additional financing strategies for needed projects and programs.
- Identify the criteria and process for prioritizing implementation of transportation plan elements (including multimodal trade-offs) for inclusion in the TIP and any changes in priorities from previous TIPs.
- List major projects from the previous TIP that were implemented and identify any significant delays in the planned implementation of major projects.
- Fulfill requirements of the U.S. Environmental Protection Agency (EPA) transportation conformity regulations.
- Include a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan.

The 2026-2029 TIP for the Twin Cities Metropolitan Area will meet all these requirements and will be submitted to the Minnesota Department of Transportation for incorporation into the STIP approved by the Governor's designee.

The Twin Cities Metropolitan Area Metropolitan Planning Organization (MPO) certifies that it is in conformance with the provisions of 49 CFR Part 20 regarding lobbying restrictions on influencing certain federal activities.

Map of the Minneapolis-St. Paul Metropolitan Area showing Principal Arterials in March 2024. The map displays a network of roads, including highways and local streets, across several counties: Sherburne, Wright, Anoka, Hennepin, Ramsey, Carver, Scott, Dakota, and Washington. A scale bar indicates distances up to 20 miles. A north arrow is present in the bottom right corner. The map is dated March 2024.

Reference Layers

- Rivers and Major Lakes
- County Boundaries
- City Boundaries
- MUSA 2040
- MPO Area

The following information is provided for each project in the TIP in Appendix A:

- Program year
- Parent project grouping
- Route
- Project number
- MnDOT program category
- Description of the project scope
- Estimated total funding in each year of the TIP along with the amount of federal funds proposed to be obligated
- Amount of advanced construction (AC, see Table 12) funds dedicated to the project in the program year
- Amount of federal, state, and other (usually local) funds dedicated to the project
- Name of the state, regional, or local agency receiving the federal funding and responsible for carrying out the project
- Indication of whether the project is regionally significant

The transportation planning process in the Twin Cities Metropolitan Area is based on Minnesota statutes and requirements of federal rules and regulations on urban transportation planning that first became effective June 30, 1983, when they were published in the Federal Register. The Metropolitan Council is the designated MPO for the Twin Cities metropolitan area and is responsible for completing the continuing, comprehensive, and cooperative (3C) transportation planning process, as defined in [Title 23, Section 450.306 of the US Code of Federal Regulations](#) (CFR). Since transportation planning cannot be separated from land use and development planning, the transportation planning process is addressed alongside the total comprehensive planning program of the Metropolitan Council. With the advent of Intelligent Transportation Systems (ITS), the planning process has been expanded to include technology deployment. As of 2005, as defined in [23 CFR 450.306](#), the coordination of ITS with the planning process is now required.

The Twin Cities regional transportation planning process is defined in the 2023 Memorandum of Understanding between MnDOT and the Metropolitan Council. Administered and coordinated by the Metropolitan Council, this process is a continuing, comprehensive, and cooperative effort, involving municipal and county governments, the Metropolitan Airports Commission (MAC), MnDOT, the Minnesota Pollution Control Agency (MPCA), transit operators, the Federal Highway Administration (FHWA), and the Federal Transit Administration (FTA). Local elected government officials participate in the process through the TAB. The TAB is a forum for the cooperative deliberation of state, regional, and local officials, intermodal interests, and private citizens. Metro Transit and suburban transit provider representatives are members of the TAB's Technical Advisory Committee (TAC). They participate in planning through the capital and service improvement planning processes coordinated by the Metropolitan Council.

In 2018, MnDOT updated the [Statewide Regional ITS Architecture](#), which was subsequently adopted by all MPOs in Minnesota, including the Metropolitan Council. A Regional ITS Architecture provides a vision of how ITS and ITS projects can be deployed to satisfy the goals and objectives outlined in the TPP and serves as a visible demonstration of how agencies can benefit from each other's activities. As needed, the Council coordinates with MnDOT and regional partners to ensure successful ITS implementation. The Architecture relates to Title 23, Section 450.306 of the CFR, specifically that the metropolitan transportation 3C planning process shall provide for consideration and implementation of projects, strategies, and services that will address a list of factors, including:

- Subsection (b)(6): Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight.
- Subsection (d) (4) (vii): An MPO shall integrate in the metropolitan transportation planning process, directly or by reference, the goals, objectives, performance measures, and targets described in other State transportation plans and transportation processes, as well as any plans developed under [49 U.S.C. chapter 53](#) by providers of public transportation, required as part of a performance-based program including the congestion management process as defined in [23 CFR 450.322](#), if applicable.
- Subsection (g): The metropolitan transportation planning process shall (to the maximum extent practicable) be consistent with the development of applicable regional intelligent transportation systems (ITS) architectures, as defined in [23 CFR 940](#).

Similarly, [23 CFR 450.208](#) calls for the coordination of data collection and analyses with MPOs and public transportation operators to support statewide transportation planning and programming priorities and decisions.

The [Minnesota Statewide Regional ITS Architecture](#):

- Provides MPOs with a useful planning tool for managing ITS funding decisions (Implementation Volume: ITS Initiatives and Project Concepts for Implementation).
- Improves continuity across the project life cycle, from planning through project development and operations.
- Meets the intent of 23 CFR 940.9.b (“Any region that is currently implementing ITS projects shall have a regional ITS architecture by April 8, 2005.”).
- Formal adoption promotes consistent use of the Regional ITS Architecture and allows planners to use aspects of the regionally agreed upon ITS architecture.
- By establishing the process, tools, and support for architecture use and maintenance in these plans, the MPO can ensure compliance with Federal requirements and be eligible for financial support for these critical activities.

Public Participation Opportunities in Preparation of the Transportation Improvement Program

A concerted effort is made to ensure all interested and concerned parties are offered an opportunity to participate in the preparation of the TIP. TAB will accept public comments on the draft TIP. The following is the schedule of public comment opportunities prior to adoption of the 2026-2029 TIP.

- May 21, 2025 – At its monthly meeting, the TAB released the draft TIP for the purpose of soliciting public comment.
- May 24 through July 7, 2025 – The TAB will accept comments submitted by email, telephone, and mail.
- June 17, 2025 – Council transportation and communications staff will host a virtual public meeting.
- August 20, 2025 – The TAB will review public comments and recommend the TIP for adoption, forwarding it to the Metropolitan Council.

In preparation, the Metropolitan Council published a public notice in the Minneapolis Star Tribune and on www.metrocouncil.org. In addition, staff will notify a broad set of stakeholders about the public comment period. Interested parties can sign up to see email alerts at www.metrocouncil.org.

For TIP amendment requests (discussed starting on page 9) public input opportunities are offered at board and committee meetings, during which they are presented as business items.

Amendment requests that impact regionally significant elements of regionally significant projects or add regionally significant projects require a 21-calendar-day public comment period to begin after TAB releases the amendment request for public comment.

Metro Transit is using the TIP's public involvement process to satisfy the public participation requirements of the FTA Section 5307 projects. The TIP serves as the FTA Section 5307 program of projects.

[Development and Content of the Transportation Improvement Program](#)

The TIP is an integral part of the overall regional transportation planning and implementation process. TIP preparation is a cooperative effort among local units of government and metropolitan and state agencies.

The planning base assumptions for projects identified and developed for the TIP includes the following plans:

- [Imagine 2050](#) establishes the regional goals and policy framework for planning for the seven counties within the Twin Cities region (Anoka, Carver, Dakota, Hennepin, Ramsey, Scott, and Washington counties). Imagine 2050, adopted in 2025, serves as the metropolitan development guide that provides the overarching vision for development of the region.
- The region's MTP, the [2050 Transportation Policy Plan](#) (TPP), is one of the five system or policy plans within Imagine 2050. It sets the regional transportation policy for all of the Council's planning area – including urbanized portions of Sherburne and Wright counties – and identifies the major, long-range transportation investments. The 2050 TPP addresses all applicable federal requirements and considerations.
- The Council's [Public Engagement Plan](#), including the [Transportation Addendum](#).
- The [Minnesota State Highway Investment Plan 2023-2042](#) (MnSHIP), developed by the Minnesota Department of Transportation, includes the district work plans, which set the investment priorities for the state highway system in the eight-county MnDOT Metro District (includes Chisago County).
- Local comprehensive plans and transportation programs, which include transportation plans that – within the seven-county region only – must be consistent with the Transportation Policy Plan developed by the Metropolitan Council.

More information about these plans and planning processes is available in the [Transportation Planning and Programming Guide for the Twin Cities Metropolitan Area](#).

Projects are selected for in several ways: discretionary funding programs created by Congress and administered by USDOT; the Met Council's and TAB's Regional Solicitation; MnDOT Metro District selection; and the project selection process for regional transit providers, including projects in the FTA Capital Investment Grants program as selected by Congress. These selection processes are discussed in Chapter 4. While most projects are programmed by MnDOT, the projects selected through the TAB's Regional Solicitation are programmed roughly every other year by the Council through a competitive selection process.

The funding percentages in Table 1 represent the approximate share of total funds of all projects in the TIP (federal, state, and local), but it should be emphasized that the funding percentages in Table 1 are not reflective of the total funding package for transportation. The TIP includes MnDOT's entire program within the MPO area, including projects that do not have any federal funding participation. Except for regionally significant projects, the TIP does not include locally funded transportation projects for the Metropolitan Council, Metro Transit, Metropolitan

Transportation Services, suburban transit providers, counties, or cities. It also does not include the significant amounts of funding required for planning, design, engineering, and right-of-way acquisition that local governments typically pay for projects receiving federal construction funding.

The TPP provides a framework for the development of specific projects managed by MnDOT, the Metropolitan Council, and county and local governmental units and agencies that are responsible for planning, constructing, and operating transportation facilities and services. All projects listed in this TIP must be consistent with the TPP. Many of the highway construction projects included in this TIP are under MnDOT jurisdiction. They originate from ongoing MnDOT planning and programming activities. The projects that lead to the completion of the metropolitan highway system, along with the projects on other major arterials, are based on the region's TPP and on MnDOT's Highway Safety Improvement Program (HSIP) and programming process. The Metropolitan Council identifies transit service needs and objectives, planned transit service and capital improvements, and the costs and funding sources that help implement the TPP.

The TPP is further refined through more detailed studies, including corridor studies and alternatives studies. These studies, including the needed environmental reviews, lead to specific project recommendations that are included in implementation programs. Other projects, such as those concerned with resurfacing, bridge improvements, and safety, arise from continuous monitoring and evaluation of existing highway facilities through MnDOT's pavement and bridge management plans.

City and county federal aid projects are products of local comprehensive and transportation planning programs and reflect local and regional priorities. These projects are determined to be consistent with regional plans before being included in the TIP. Such plans must also be consistent with the TPP.

Figure 2: Transportation Improvement Program (TIP) Development and Approval Process

* The TAB's recommendation is returned for revision only if the Council finds the TIP inconsistent with Council policy.

Table 1: Percentage of Funding by Selection Process

Funding Process	Share of TIP	Share of Federal in TIP
Federal (HPP and Other)	9%	9%
TAB Regional Solicitation Selection	18%	18%
MnDOT District Selection*	32%	35%
MnDOT Office of Transit Selection*	<1%	<1%
Metro Transit Providers Selection**	41%	38%

*This TIP includes all projects selected by MnDOT, including those without federal funding. Most projects are selected by Metro District, but Sherburne County and Wright County projects are selected by MnDOT District 3.

**Metro Transit numbers include projects funded with FTA Capital Investment Grants funding.

Estimating Project Costs

Projects beyond the first program year of the TIP will most likely be subject to inflation. Projects in the TIP are estimated in recognition of this reality to determine the cost in terms of year of expenditure. Each programming agency has its own approach to estimating inflated project costs. These approaches are:

- Metro Transit: Inflation is built into project amounts during the process of creating the six-year Capital Improvement Program for Transit divisions at the Council. This includes projects awarded in the Regional Solicitation.
- MnDOT: Each year, a revised inflation adjustment table is used to update construction estimates and produce an inflated estimate for each project.
- Metropolitan Council-programmed Regional Solicitation non-transit projects and MnDOT-programmed HSIP projects: For the 2026-2029 TIP, projects to be administered by FHWA awarded via the 2024 Regional Solicitation were adjusted at two percent per obligation year, with 2024 as the base, from their original cost estimate submitted in their funding application. The adjustments are entirely reflected in the local contribution, as the federal contribution is set at the time of award. The two percent per year adjustment derives from the Federal Reserve present target for inflation. Following this initial placement in the TIP, MnDOT monitors project costs and adjusts them as discussed in the above bullet. For FTA-administered projects, inflation is an assumption in the yearly [Metropolitan Council Transit CIP](#).

Amending or Modifying the TIP

Over the course of the year, it sometimes becomes necessary to amend or modify the TIP. Changes to the TIP include the addition of a new project, a significant change of scope that alters a project's description, and significant cost changes.

A change to the TIP can go through one of four processes, depending on the nature of the project and the degree to which the project is proposed to change. These changes include the following:

- Administrative Modification. An administrative modification requires no board action and is reserved for minor changes, including program year changes, minor cost changes, funding source changes, technical corrections, and splitting a project into multiple projects. This also applies to actions on projects with no federal funding, except for regionally significant projects.
- Formal TIP Amendment. A formal TIP amendment is a more substantive change such as the addition of a new federally funded project, a change to the type of work on a project, a significant cost change, or a change in project termini. Formal TIP amendment

requests must be approved by the Metropolitan Council following recommendation from TAB. Formal TIP amendments follow one of three processes:

- Standard TIP amendment request. Standard TIP amendment requests are provided to the Funding & Programming Committee and TAC for technical recommendations before going to TAB for a recommendation. Once a TIP amendment is recommended by TAB, the Transportation Committee provides a recommendation to the Metropolitan Council on whether to approve the amendment request. The Council then determines whether to approve the amendment request.
- TIP amendment request to amend a regionally significant project. A project is considered regionally significant if it adds or removes one or more travel lanes on a principal arterial roadway; involves the addition of an interchange; involves the reconfiguration of an interchange for which a movement is added or eliminated; adds a new transitway; adds or removes a transitway station; or adds a permanent park-and-ride facility with at least 250 stalls. TIP amendments involving regionally significant projects follow the standard amendment process with the addition of a 21-day public comment period. TAB releases the amendment for public comment. After the 21-day period is over, the amendment goes back to TAB for recommendation. A TIP amendment request to a regionally significant project may not have to go through this process if the change does not impact regionally significant project elements.
- Streamlined TIP amendment request. The streamlined amendment process was established in 2014 and updated in 2020 to expedite routine amendments. Streamlined amendments are first reviewed by TAC and are included on TAB's consent agenda for recommendation to the Council. To be eligible for the streamlined process, a proposed amendment must be consistent with the TPP; must not add a new regionally significant project to the TIP; and must not relate to a scope change through TAB. The streamlined TIP amendment process can be found in Appendix B

The Metropolitan Council follows FHWA and FTA guidance in determining whether a proposed change requires a formal amendment to the State TIP (STIP). That guidance can be found on [MnDOT's website](#). Cost change thresholds that determine whether a request is a modification or amendment are shown in Table 2.

Table 2: TIP Amendment and Modification Cost Change Thresholds*

STIP Total Project Estimated Cost	Modification	Amendment
<\$1,000,000	Not required**	Not required**
\$1,000,001 to \$3,000,000	20%	50%
\$3,000,001 to \$10,000,000	20%	35%
\$10,000,001 to \$50,000,000	10%	20%
\$50,000,001 to \$100,000,000	10%	15%
>\$100,000,000	***	10%

*FHWA projects. FTA projects use a 20% threshold for an amendment. No threshold exists for a modification.

**Applies when total project cost estimate is less than \$1 million and the proposed total estimate cost remains less than \$1 million.

***Processing an administrative modification for high-profile projects (greater than \$100 million), when the change impacts financial constraint, requires prior collaborative discussion with FHWA.

Federal Legislation Changes

The Infrastructure Investment and Jobs Act (IIJA) was signed into law on November 15, 2021, as a five-year surface transportation authorization. Funding for specific programs is shown in Tables 13, 15, and 16.

In the spring of 2012, the U.S. Census Bureau released the updated urbanized area (UZA) boundaries for metropolitan areas across the country. At the time, the data added portions of Wright and Sherburne counties in Minnesota, and the city of Houlton, Wisconsin into the Minneapolis-St. Paul urbanized area. In 2023, the region's UZA boundaries were again updated to reflect the 2020 Census data. This update included a slight expansion of the urbanized area in Wright and Sherburne counties and the elimination of the Wisconsin urbanized portion. As the metropolitan planning organization for the Twin Cities region, the Metropolitan Council is required by federal law to become involved in the transportation planning efforts of areas that are within the urbanized boundary even if they extend beyond the seven-county region. Therefore, the 2026-2029 TIP must include projects within the contiguous urbanized areas of Wright and Sherburne counties.

Federal Program Areas in the Transportation Improvement Program

Highway and transit funding programs are described below.

Surface Transportation Block Grant (STBG) Program. This program accommodates funding for projects on any roads (including those along the National Highway System, or NHS) that are not functionally classified as local or rural minor collectors, along with pedestrian projects, bicycle/pedestrian trails, and Safe Routes to School projects. Bridge projects paid for with STBG Program funds may be on any public road. Transit capital projects are also eligible. Included in the program is a set-aside for the Transportation Alternatives Program (TAP), which is primarily used for bicycle, pedestrian, and Safe Routes to School projects in the TIP.

Congestion Mitigation and Air Quality Improvement Program (CMAQ). CMAQ directs funds toward transportation projects in non-attainment and maintenance areas for ozone, carbon monoxide (CO), and particulate matter. These projects contribute to meeting or maintaining the attainment of national ambient air quality standards. In the Twin Cities region, CMAQ funds are used for travel demand management, transit service expansion, or highway traffic management technology projects (such as traffic signal coordination).

Highway Safety Improvement Program (HSIP). This program is designed to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-state-owned public roads and roads on tribal lands. HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance. Railway-Highway Grade Crossing Safety funds, which are safety-focused, are part of this program.

Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT). This program is aimed at helping make surface transportation more resilient to natural hazards such as flooding, extreme weather events, and other natural disasters.

Carbon Reduction Program (CRP). This provides funding for projects designed to reduce transportation-related air pollution, defined as carbon dioxide (CO₂), from on-road highway sources.

Bridge Funding Program. This program provides funding for the rehabilitation and replacement of existing bridges. This program applies to bridges under the jurisdiction of a public authority, located on a federal aid roadway (i.e., on the federal aid system) and open to the public.

National Highway Performance Program (NHPP). The National Highway System (NHS) consists of 161,000 miles of major roads in the United States and 5,356 miles in Minnesota. Included are all Interstate highways and a large percentage of urban and rural principal arterials, the Strategic Highway Network (STRAHNET), and strategic highway connectors. All NHS routes in the region are eligible to use NHPP funds. NHPP provides support for the condition and performance of the NHS, for the construction of new facilities on the NHS, and to ensure that investments of federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a state's asset management plan for the NHS.

National Highway Freight Program (NHFP). The IIJA's precursor, the Fixing America's Surface Transportation Act (FAST) Act, established the National Highway Freight Network. The NHFP funds projects that contribute to the efficient movement of freight on that designated network.

Transit Section 5307 Urbanized Area Formula Grants. This program provides assistance with transit capital and operating costs, including job access and reverse commute activities. This now includes job access and reverse commute activities formerly funded under Section 5316, which was rescinded in MAP-21.

Transit Section 5309 Capital Investment Grants Program. This program funds major new and expanded rail and bus rapid transit system projects.

Transit Section 5310 Mobility of Seniors and Individuals with Disabilities Program. This program funds the purchase of lift-equipped vehicles by nonprofit organizations that provide transportation for seniors and individuals with disabilities. This can include projects specifically designed to meet the needs of seniors and individuals with disabilities, transit projects that exceed ADA standards, and transit projects that improve access to fixed-route transit and decrease reliance on paratransit.

Transit Section 5311 Program. This program is available for planning, operating, and capital assistance to areas with populations below 50,000 in rural areas.

Transit Section 5337 State of Good Repair Program. This program is designed to maintain public transportation systems in a state of good repair, focusing on fixed guideway and high-intensity bus systems.

Transit Section 5339 Bus and Bus Facilities Program. This program provides funds for capital projects to replace, rehabilitate, and purchase buses and bus-related equipment and construct bus-related facilities.

Other Funding Sources

Other funding sources outside of the above funding programs include those listed below.

Miscellaneous Federal Funds. Less frequently used programs include:

- Bridge Replacement Off-System (BROS): A federally funded bridge replacement program intended to reduce the number of deficient off-system bridges within the state. This program applies to bridges under the jurisdiction of a public authority, located on a non-federal aid roadway and open to the public.
- Highway Rail Grade Crossings and Rail Safety (RRS): included with the HSIP projects in Appendix A.
- Federal Land Access Program (FLAP).

Congressionally Directed Spending. High priority projects, the National Corridor Improvement Program, and projects of regional and national significance.

State Funds. Projects funded almost entirely with state funds.

Bond Funds. Projects funded almost entirely with bond funds.

Other. Many projects include funding amounts in the “other” field. Funding identified as “other” could include funding from state or federal grants or other funding sources including local funds.

2. REGIONAL PLAN AND PRIORITIES

All projects in the TIP are reviewed for consistency with the Transportation Policy Plan (TPP). The Metropolitan Council adopted the TPP on February 12, 2025. The TPP is in balance with anticipated revenues over the 20-year planning period. The Council carried out an extensive public participation process and held a public hearing on the TPP prior to adoption.

Conformity to the Clean Air Act Requirements

The Minneapolis-Saint Paul region is within an EPA-designated attainment area for all transportation-related pollutants. In the past, portions of the region had unacceptably high measured concentrations for carbon monoxide and for PM₁₀. The region has been in full attainment for carbon monoxide since November 29, 2019, and for PM₁₀ since September 24, 2022. Formal conformity requirements under the federal Transportation Conformity Rule no longer apply to the TIP.

Imagine 2050 and the Transportation Policy Plan

The TIP is consistent with the 2050 TPP, which is a system plan in Imagine 2050, adopted by the Metropolitan Council on February 12, 2025. Imagine 2050 establishes the vision and goals for planning the Twin Cities metropolitan area. It shapes how this region will grow over the next 30 years and provides five system or policy plans.

Imagine 2050 policy is organized around five shared regional goals:

- Our communities are healthy and safe.
- Our region is dynamic and resilient.
- We lead on addressing climate change.
- We protect and restore natural systems.
- Our region is equitable and inclusive.

The TPP builds on these goals with 16 objectives focused on the outcomes for the transportation system, which are further supported by policies and actions.

3. FEDERAL PERFORMANCE MEASURES AND TARGETS

Pursuant to Title 23, Section 450.326(d) of the Code of Federal Regulations (CFR), the Metropolitan Council is required to incorporate a performance-based planning approach when developing the TIP. This includes an analysis of the anticipated effect the TIP may have towards achieving the performance targets adopted for the Council's MPO planning area. Specifically, the regulation states: *The TIP shall include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan, linking investment priorities to those performance targets.*

This approach was first established in 2012 with the federal Moving Ahead for Progress in the 21st Century Act (MAP-21), which established performance-based planning and identified the federal performance measures for safety, pavement and bridge condition, reliability, freight, congestion mitigation and air quality improvement (CMAQ), transit asset management, and transit safety. The requirements continue through the federal IIJA. The following are the broad performance measure categories that must be included in the 2026-2029 TIP:

- Highway Safety Performance
- Pavement Condition
- Bridge Condition
- System Reliability
- Congestion Mitigation and Air Quality (CMAQ)
- Transit Asset Management (TAM)
- Transit Safety Performance (PTASP)

Highway Safety Performance Measure

Council Activities and Progress

The 2050 Transportation Policy Plan sets an objective that "people do not die or face life-changing injuries when using any form of transportation," which is supported by policies and actions that the Met Council and regional partners will implement. The plan's Evaluation and Performance section tracks performance on this objective, including the five federally-required safety performance measures. The Met Council must annually adopt performance targets for each of these highway safety performance measures.

The region has implemented several proactive and reactive strategies to improve safety for users of all forms of transportation within the metro area. These include a commitment to aggressively reduce the number of crashes involving fatalities and serious injuries annually, with the ultimate aspirational goal of achieving zero fatalities and serious injuries in support of the 2050 Transportation Policy Plan objective.

Table 3 shows the adopted targets for 2025 and baseline data, which advance a long-term goal of zero deaths and serious injuries.

Table 3: Adopted safety targets and baseline performance for 2025

Measure	2019-2023 Actual Average	2021-2023 Actual Average	2023 Actual	2025 Target
Number of Traffic Fatalities	153	171	147	≤ 74
Fatality Rate (per 100 million VMT)	0.57	0.63	0.53	≤ 0.26
Number of Serious Injuries	811	888	924	≤ 464
Serious Injury Rate (per 100 million VMT)	3.00	3.25	3.32	≤ 1.64
Number of non-motorized fatalities and serious injuries	192	207	199	≤ 115
Pedestrian fatalities	30	33	29	N/A
Bicyclist fatalities	4	3	4	N/A
Pedestrian serious injuries	112	120	112	N/A
Bicyclist serious injuries	45	50	54	N/A

In addition to the TPP, the Council and its regional partners have completed several studies that directly address safety issues and propose strategies to improve safety in the metro area.

These studies and plans include the [Regional Safety Action Plan](#) from 2024; the [Regional Pedestrian Safety Action Plan](#) from 2022; the [Minnesota Strategic Highway Safety Plan](#); the [Congestion Management and Safety Plan \(CMSP\) IV](#); the [Intersection Mobility and Safety Study \(formerly Principal Arterial Intersection Conversion Study\)](#); and applicable modal and county-produced safety plans.

Efforts like [Towards Zero Deaths](#) and [Vision Zero](#) strive to achieve the long-term goal of eliminating fatalities and serious injuries on the transportation network. The Council supports these goals and will consistently work towards reducing fatalities and serious injuries.

Anticipated Effect of the Safety Performance Measures

The 2026-2029 TIP is anticipated to have a positive effect towards meeting the region's established safety performance targets. The TIP reflects \$123.5 million in FHWA Highway Safety Improvement Program (HSIP) funds, in addition to state and local match funding of \$7.6 million and \$47 million, respectively. These projects address both existing locations (reactive projects) and the design of newer projects (proactive projects) that pre-emptively address safety in their designs. Further, safety has been a key scoring criterion for several funding categories in the biennial Regional Solicitation for Transportation Projects for the last decade. Further, the TAB increased the weighting of safety in many categories in the 2024 Regional Solicitation and is exploring further emphasizing safety moving forward. In addition to federal funding sources, the region has used several other revenue sources to improve transportation safety in the metro area. Examples include several county- and city-funded safety projects as well as MnDOT's CMSP funding set aside each year.

Metropolitan Planning Organization Investment Priorities

The Council has adopted objectives, policies, and actions intended to improve transportation safety. As outlined in the Transportation Policy Plan, key objectives are that people do not die or face life-changing injuries when using any form of transportation and that people feel safer, more comfortable, and more welcome when using any form of transportation.

Specific policies the Council and its partners will use and implement to meet the safety objectives include:

- Work to eliminate fatalities and serious injuries from traffic crashes on the transportation system by 2050 using the Safe System Approach.
- Plan for investment in transportation facilities that are and are high quality and comfortable for all users.
- Emphasize and prioritize the safety of people outside of vehicles in the transportation right-of-way.

Each policy includes supporting actions for the Council and its transportation system partners.

Pavement and Bridge Condition Performance Measures

Council Activities and Progress

The Council reviews and adopts pavement and bridge condition performance targets. As an MPO, the Council has the option to either plan and program to support the adopted MnDOT statewide targets or adopt targets specific to the region.

Table 4: Existing Conditions and Adopted Condition Targets

Measure	2018	2019	2020	2021	Existing Performance	Council 2025 Target
Bridges (by deck area)						
% good condition	34%	29%	27%	25%	28%	20%
% poor condition	2%	4%	4%	5%	5%	5%
Interstate Pavement						
% good condition	62%	59%	63%	70%	70%	60%
% poor condition	1%	2%	1%	2%	2%	2%
Non-Interstate NHS Pavement						
% good condition	55%	56%	63%	58%	57%	40%
% poor condition	1%	1%	<1%	<1%	0.5%	2%

Anticipated Effect of the Pavement/Bridge Performance Measures

The 2026-2029 TIP is anticipated to have a positive effect on the pavement and bridge performance measures, as there are projects programmed specifically for the purpose of improving bridge and pavement conditions. While both interstate and non-interstate NHS pavement conditions within the metro area are performing at a level greater than the targets, resources must be provided to ensure they continue to meet the needs of the region by not falling into poor condition.

Currently, the metro area is meeting the adopted target for the percent of bridges by deck area in good condition. Moving forward, the Council will continue to monitor bridge deck condition and explore mechanisms to ensure the future targets are met. Much like MnDOT, the region's emphasis is on ensuring facilities do not fall into poor condition. Projects in the TIP that will help address bridge needs include:

- Replace County Road C bridge over BNSF Railroad in Roseville (062-623-066)
- Replace Cedar Lake Road bridge over BNSF Railroad in Minneapolis (141-406-002)
- Replace Pillsbury Avenue S. historic bridge over Midtown Greenway in Minneapolis (141-597-001)
- Replace I-35E bridge over Shepard Rd (6280-419)
- Rehabilitation of 13 bridges on MN 280 (6242-83 and 6242-87)
- Repair bridge on MN 3 (Robert St) from Curtice St to Congress St in St. Paul (6217-59)
- Replace CSAH 77 bridge over commercial railroad in New Brighton (062-677-035)
- Replace Eden Prairie Road Bridge over TC&W Railroad in Eden Prairie (027-604-017)
- Replace Pioneer Trail Bridge over HCCRA Railroad in Eden Prairie (027-601-047)
- Replace CSAH 1 bridge over HCCRA Railroad in Eden Prairie (027-752-039)
- Replace Nicollet Avenue Bridge over I-94 in Minneapolis (2781-552)
- Redeck CSAH 54 Bridge over I-35 W in Columbus (0282-86)
- Rehabilitate ten bridges on MN 77 in Eagan and Bloomington (2758-75)

System Performance

Council Activities and Progress

The Council adopted the initial system reliability (shown on Table 5) for the region in 2023.

The existing metro area performance for the percent of reliable person-miles traveled on the interstate system is approximately 91%. MnDOT established a state-wide target of 82%, which the Council also adopted for the metro area. Because almost all congestion within the State of Minnesota occurs within the Metro Area, the Council will usually adopt targets specific to the region that differ from the state-wide targets. However, the Council did not do so for 2023 and 2025 due to the use of pandemic-era data, which likely inflates the existing reliability data.

For the same reason, the Council has also elected to adopt MnDOT's targets for the truck travel time reliability index measure. The use of pandemic-era data leads these targets to appear to aspire to declining performance. However, pre-pandemic performance was only 69.5% for reliable person-miles traveled on the Interstate, 79.6% for reliable person-miles traveled on the non-Interstate NHS, and a truck-travel time reliability index of 2.32. Post-pandemic data is likely to bring performance closer to these numbers. There is no consequence for the Council for not meeting these targets, and the State of Minnesota as a whole is likely to meet its adopted targets. The Council has chosen these targets as a mechanism to aim for improvement in reliability (versus likely post-pandemic performance) in the immediate future and prioritize highway projects within the TIP thusly.

Table 5: Existing Conditions and Adopted System Reliability Targets

Measure	2019	2021	Existing Performance	2025 Target
% of reliable person-miles traveled on the Interstate	69%	70%	91%	82%
% of reliable person-miles traveled on the non-Interstate NHS	77%	80%	95%	90%
Truck travel time reliability index	2.23	2.32	1.49	<1.4

Anticipated Effect of the System Reliability Measure

The 2026-2029 TIP includes projects that are anticipated to have a positive effect on mobility and system reliability. This includes several spot mobility enhancements as well as large set-asides for future mobility projects. Two examples include construction of a grade separation of MN 65 at CSAH 12 and MSAS 147 in Blaine (002-312-033) and construction of a roundabout at County Road 7 (7th Ave) and County Road 158 (165th Ave) in Andover (002-607-029).

Transit Asset Management (TAM) Performance Targets

Transit asset management (TAM), a best practice and a requirement under federal law, is a business model that prioritizes funding decisions based on the condition of transit assets. Transit providers are required to assess, track, and report on their assets to FTA, and develop annual targets for asset management to ensure a state of good repair. Transit providers also develop transit asset management plans that document the implementation actions for asset management within their transit systems. TAM plans must be coordinated with the Council as the region's MPO. The four FTA-required performance measures for transit asset management are:

- Rolling stock (buses and trains used for serving customers): The percentage of revenue vehicles (by type) that exceed the useful life benchmark.
- Equipment (vehicles used in a support role): The percentage of non-revenue service vehicles (by type) that exceed the useful life benchmark.
- Facilities: The percentage of facilities (by group) that are rated less than 3.0 on the [Transit Economic Requirements Model \(TERM\) Scale](#).
- Infrastructure: The percentage of rail track segments (by mode) that have performance restrictions. Track segments are measured to the nearest one-hundredth of a mile.

The region's transit operators established regional performance targets in 2022. Table 6 summarizes the adopted targets:

Table 6: Adopted Transit Asset Management Targets (*italicized to be updated prior to final TIP*)

Measure	2022	2023	2024	Baseline	2024 Target
Rolling Stock: % exceeding useful life					
Articulated Bus	15.66%	9.80%	5.62%	10.36%	7.35%
Over-the-Road Bus	8.84%	7.09%	8.00%	7.98%	8.70%
Bus	9.23%	18.59%	36.45%	21.42%	41.59%
Cutaway	47.12%	61.47%	61.47%	N/A	27.60%
Light Rail Vehicle	0%	0%	0%	0%	0%
Other	-	80.00%	80.00%	N/A	N/A
Commuter Rail Locomotive	0%	0%	0%	0%	0%
Commuter Rail Passenger Coach	0%	0%	0%	0%	0%
Equipment: % meeting or exceeding useful life					
Automobiles	50.00%	50.00%	66.67%	55.56%	66.67%
Trucks/other Rubber Tire Vehicles	28.96%	37.07%	35.13%	33.72%	26.13%
Facility: % rated below 3 on condition scale					
Passenger/Parking Facilities	0.97%	0%	0%	0.32%	0%
Admin/Maintenance Facilities	0%	0%	0%	0%	0%
Infrastructure: % of track with performance restrictions					
Light Rail	1.00%	1.00%	0.00%	0.67%	1.00%

Transit Asset Management Investment Priorities

The Council's Transportation Policy Plan (TPP) outlines the goals, objectives, and strategies that are used to set transit asset management investment priorities for the region. These factors, in turn, directly guide the investment plan and transit projects programmed within the TIP. The TPP guides transit asset management investments through the following policies and actions:

- Implement systems that track and prioritize conditions of pavement, bridges, transit, pedestrian and bicycle infrastructure, and other assets.
- Use asset management investments should be used to include additional elements that help achieve regional goals and objectives. Use additional criteria like safety to prioritize asset management projects.

Asset management activities are the responsibility of regional transit providers that own and maintain their assets. The Council's [Fleet Management Procedures](#) provide guidance for minimum vehicle life and inform the TAM performance targets established by the region's transit

providers. This document outlines the conditions used to determine if the replacement of assets is necessary or can be deferred, including the point at which fleet vehicles are eligible for mid-life rehab procedures. The Fleet Management Procedures also set the principles used for determining the end vehicle's useful life, a preventative maintenance schedule, and the process for the purchase of new vehicles. The Council MPO staff participate in discussions around transit asset management targets to ensure consistency with regional plans and policies.

Key pools of funds used to replace aging assets are FTA Sections 5337 and 5339, which are prioritized via the Regional Transit Capital Improvement Program (CIP), developed by Metro Transit and the suburban transit providers.

Transit Safety Performance Measures Targets (PTASP)

Measures Overview

In order to reflect the broad and varied nature of public transportation, the FTA has identified standard Safety Performance Measures that can be applied to all modes of public transportation and are based on data currently submitted to the National Transit Database.

As part of transit provider agency safety plans, the FTA requires transit providers to establish, by mode, safety performance targets in four Safety Performance Measure categories, shown in Table 7.

Table 7: Safety Performance Categories and Measures

Safety Performance Measure Category	Safety Performance Measure
Fatalities	Total number of reportable fatalities
Fatalities	Fatality rate per total vehicle revenue miles
Injuries	Total number of reportable injuries
Injuries	Injury rate per total vehicle revenue miles
Safety Events	Total number of reportable safety events
Safety Events	Rate of safety events per total vehicle revenue miles
System Reliability	Mean distance between major mechanical failures

The FTA provides the following definitions for safety performance measures in the National Transit Database:

- **Reportable fatalities:** These are fatalities reported to the NTD (deaths confirmed within 30 days) except for deaths in or on transit property that are a result of illness or other natural causes. These include deaths due to collision, derailment, fire, hazardous material spill, act of God, system or personal security event, or other safety event.
- **Reportable injuries:** These include instances of damage or harm to persons that require immediate medical attention away from the scene because of a reportable transit safety event. Serious injuries, which are defined based on severity, are always reportable, even if a person was not immediately transported from the scene for medical attention. Injuries from assaults and other crimes are not a part of this.

- **Reportable safety events:** These include incidents (including accidents and derailments) meeting NTD major reporting thresholds for transit rail, bus, and paratransit. These events may occur on transit right-of-way or infrastructure, or at a transit revenue facility, maintenance facility, or rail yard. They may take place during a transit-related maintenance activity or otherwise involve a transit revenue vehicle. Examples of these events include:
 - Collisions
 - Fires
 - Derailments (mainline and yard), including non-revenue vehicles
 - Hazardous materials spills
 - Acts of God³
- **Major mechanical failures:** The NTD defines major mechanical failures as “a failure of some mechanical element of the revenue vehicle that prevents the vehicle from completing a scheduled revenue trip or from starting the next scheduled revenue trip because actual movement is limited or because of safety concerns. Examples of major mechanical failures include breakdowns of brakes, doors, engine cooling systems, steering, axles and suspension.

Targets Overview

The Federal Transit Administration has requirements and provides some guidance for transit providers in setting their Safety Performance Targets (SPTs). Transit agencies are required to set SPTs by mode. Agencies are allowed to set targets for mode categories as broad as “fixed-route bus,” “non-fixed-route bus,” and “rail” when setting SPTs. Each of these mode categories corresponds to the variety of modes reported to the NTD.

Transit agencies are required to set targets for total number of incidents and rates of incidents. When establishing SPTs for total numbers of incidents, transit providers may consider the total number of incidents they expect to experience per year as they define it. They may choose calendar, fiscal or NTD reporting year. When defining rates for SPTs, agencies may base rates on per vehicle revenue mile, or any multiple thereof, such as per 100,000 or one million vehicle revenue miles.

When establishing SPTs, transit providers may choose to set aspirational SPTs or targets that represent improvement over current safety performance levels, among other options. To the extent possible, the FTA recommends that transit providers set realistic SPTs that consider relevant safety goals and objectives. While transit providers may select SPTs that reflect an improvement in safety performance, they do not necessarily have to do so and could focus on maintaining current safety performance.

Transit providers are not required to report their SPTs to the FTA at this time. However, the FTA will ensure that transit agencies comply with the PTASP regulation by reviewing safety plans through the existing Triennial Reviews and State Management Reviews. The FTA has not established, and does not impose, penalties for transit providers that do not meet the SPTs they set.

³ FTA. *National Transit Database Safety and Security Policy Manual*. January 2020. Accessed March 29, 2021 at <https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/ntd/146986/2020-ntd-safety-and-security-policy-manual.pdf>, pg. 18.

MPO Responsibilities

The PTASP rule requires that transit providers make their SPTs available to states and MPOs. These providers must also coordinate with states and MPOs as the MPO sets the regional transit safety performance targets. MPOs must incorporate regional transit SPTs into their planning processes and documents, as is required for targets for all federal performance areas. In general, the Metropolitan Council can consider how the projects and programs it selects to receive federal funding improve transit safety outcomes. The Metropolitan Council would also have to incorporate regional transit safety performance targets into the Transportation Policy Plan. The Metropolitan Council would also have to incorporate the regional TSPs into the TIP and “to the maximum extent practicable, provide a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan,” with the intent of linking investment priorities to regional transit safety performance targets.

Regional Transit Agency Safety Targets: Metro Transit

Metro Transit monitors performance and sets federally required targets for rail and fixed-route bus service. The Strategic Initiatives department of Metro Transit works with data collected from many sources to identify significant risk factors and trends in accidents and injuries, leading to informed recommendations for accident reduction programs and more efficient use of limited resources.

Table 8: Metro Transit Bus and Light Rail Safety Performance Targets (*italicized to be updated prior to final TIP*)

Performance Measure	Baseline-Bus	Target-Bus	Baseline-Rail	Target-Rail
Collisions per 100k Vehicle Revenue Miles	0.313	.303	0.342	0.738
Annual Fatalities from Vehicle Operations per 100k Vehicle Revenue Miles	0.010	0.007	0.084	0.049
Annual Injuries from Vehicle Operations (per calendar year)	67	120	56	86
Rate of Injuries per 100k Vehicle Revenue Miles	0.705	0.643	2.041	2.076
Number of Safety Events (per calendar year)	125	91	92	101
Rate of Safety Events per 100k Vehicle Revenue Miles	0.68	0.484	2.52	2.400
Annual Major Mechanical Failures (per calendar year)	<i>4,085.0</i>	198	<i>131.8</i>	162
System Reliability – Vehicle Mean Distance Between Failures (MDBF) in miles	<i>5,084.4</i>	7,065	<i>25,961.7</i>	25,000

Regional Transit Agency Safety Targets: Metropolitan Transportation Services Contracted Services

The Metropolitan Council’s Metropolitan Transportation Services Contracted Services arrived at its transit safety performance targets in the development of its Agency Safety Plan. Safety performance targets are based on past performance of each mode that MTS Contracted Service operates.

Table 9: Metropolitan Transportation Services Fixed-Route, Demand Response, and Vanpool Safety Performance Targets

Performance Measure	Baseline-Fixed Route	Target-Fixed Route	Baseline-Demand Response	Target-Demand Response	Baseline-Vanpool	Target-Vanpool
Estimated Annual Vehicle Revenue Miles (VRM) (2021)	3,239,678	N/A	24,733,972	N/A	962,410	N/A
Annual Fatalities	0	0	0	0	0	0
Fatalities per 100k VRM	0	0	0	0	0	0
Annual Injuries	6	3	35	11	0	0
Injuries per 100k VRM	0.19	0.1	0.14	0.042	0	0
Annual Safety Events	9	4	54	34	0	0
Safety Events per 100k VRM	0.27	0.133	0.22	0.13	0	0
Annual Major Mechanical Failures	5	5	224	300	1	0
System Reliability – Miles Between Major Mechanical Failures	803,158	600,000	118,239	86,667	962,410	700,000

Regional Transit Agency Safety Targets: Minnesota Valley Transit Authority

MVTA's transit safety performance targets are based on the agency's Public Transit Agency Safety Plan. Baseline performance metrics listed below are a five-year rolling average from 2020-2024.

Table 10: Minnesota Valley Transit Authority Transit Safety Performance Targets

Performance Measure (Fixed-Route Bus and Demand Response)	Baseline	Target
Fatalities (Total)	0.6	0
Fatalities (per 100 thousand VRM)	0.023	0
Injuries (total)	1.4	6
Injuries (per 100 thousand VRM)	0.039	0.20
Safety Events (total)	3.8	8
Safety Events (per 100 thousand VRM)	0.119	0.365
System Reliability (VRM/failures)	13,733.6	9,000

Regional Transit Agency Safety Targets: Southwest Transit

Southwest Transit's transit safety performance targets are based on the agency's Public Transit Agency Safety Plan. Baseline performance metrics listed below are a five-year rolling average from 2020-2024.

Table 11: Southwest Transit Fixed-Route and Demand Response Safety Performance Targets

Performance Measure	Baseline-Fixed Route	Target-Fixed Route	Baseline-Demand Response	Target-Demand Response
Annual Fatalities	0	0	0	0
Fatalities per 100k VRM	0	0	0	0
Annual Injuries	0.83	1	1.80	2
Injuries per 100k VRM	0.16	0.156	0.15	0.21
Annual Safety Events	0.40	1	1.60	1
Safety Events per 100k VRM	0.09	0.117	0.13	0.933
System Reliability (VRM / Failures)	18,938	22,692	58,692	77,883

The Council supports the efforts to move towards a performance-based planning approach, and will continue to work closely with regional, state, and federal partners to proactively establish and monitor both the required federal and the regionally adopted performance measures over time. Moving forward, the Council will continue to devote substantial resources to this effort and work closely with stakeholders to assess the federal targets and the regional performance measures and adjust to changes in the performance of the system by shifting regional investment priorities.

4. PROJECT SELECTION PROCESSES AND CONSISTENCY WITH FINANCIAL RESOURCES AND ADOPTED TRANSPORTATION PLAN

This chapter discusses the sources (federal, state, regional, local) and amount of transportation funds available for projects and programs in the region; the processes used to select projects and programs for the TIP; the balance between costs for selected projects and resources; and project consistency with the region's MTP, the Transportation Policy Plan (TPP). A key element in the TIP fiscal constraint analysis is the balance between anticipated revenues and project costs.

Processes to Allocate Federal and State Transportation Funds

Several processes are used to allocate federal and state transportation funds to the Twin Cities Metropolitan Area. Projects have been selected by Congress (federal Congressionally Directed Spending Projects and FTA Capital Investment Grants program), the TAB Regional Solicitation, MnDOT Metro District, and Council selection for regional transit providers.

Federal highway funding that goes to the TAB's Regional Solicitation and to MnDOT's Metro District is allocated by federal and state formulas. For federal and state highway funding, MnDOT uses a process to allocate the funds to the state's eight Area Transportation Partnership (ATP) regions, one of which covers the MnDOT Metro District. This process ensures the regional TIPs and the State Transportation Improvement Program (STIP) meet the federal fiscal constraint requirement. The MnDOT fund allocation process has the following steps:

1. The MnDOT Office of Transportation System Management (OTSM) identifies the amount of funds available to each ATP for the TIP period from the STBG Program, CMAQ, and HSIP programs. This funding amount is called the "funding target." The funding targets are sent to the ATPs for comment along with guidance for draft TIP preparation.
2. The ATPs, of which TAB is one, develop their draft ATP TIPs (ATIPs) using their funding targets. MnDOT Metro District completes most of this work.
3. ATIPs are provided to the MPOs, who create their TIPs.
4. OTSM reviews the draft TIPs, confirms the total highway funding amount programmed matches the total expected funding, and confirms fiscal constraint for the highway funding. All of the draft TIPs contribute to the draft State Transportation Improvement Program (STIP).
5. OTSM circulates the draft STIP to the ATPs. Each ATP may then modify and adopt its final TIP and submit it to MnDOT for incorporation into the final STIP.

Some transit funding is allocated by federal formula (Section 5307, Section 5310, Section 5311, Section 5337, and Section 5339), but funding for the FTA Capital Investment Grants program (Section 5309) is secured through a national competition. Section 1 (Introduction) includes a list of each federal transit funding program and describes eligible projects. Section 5337 and 5339 funds are provided to the Council as the region's designated federal recipient and used to maintain the rail system and purchase fleet for all regional providers. Section 5307 is allocated among regional providers according to principles adopted by the Council through action 2001-49. Section 5309 is discretionary Capital Investment Grants (e.g. New Starts and Small Starts) funding appropriated by Congress to major transit capital projects. The funding is awarded to the Metropolitan Council after a major competitive process involving environmental review, preliminary engineering and design, and obtaining commitments of 50 percent of the total cost of the project by local cost-sharing partners. Section 5310 and Section 5311 funds are provided to the MnDOT Office of Transit as the State's designated agent.

Resources Available 2026–2029

Most federally funded projects require a local match provided by the sponsoring agency. This local match can come from state trunk highway funds, state general funds, state bond funds, motor vehicle sales tax (MVST) funds, regional transit capital bond funds, city or county general funds, county transportation sales tax funds, or from funding from other agencies. The local match funds add to the resources available to pay for projects in the TIP.

Transportation resources available to the region for highway, transit, and non-motorized projects are just over \$6.4 billion over the 2026 to 2029 period (See Tables 13, 14, and 15). These funds include capital investments for highway, transit, and non-motorized modes and some operating funds for the metropolitan transit systems. Highway programs such as the Surface Transportation Block Grant (STBG) Program also provide funding for non-motorized investments listed as well as bicycle and pedestrian elements of roadway projects.

The approximate amounts programmed by mode are displayed in Figure 3. These numbers are approximate because many projects, particularly roadway projects, include investments designed for more than one mode and are listed with the primary mode served. The percentage of the region's TIP funding being invested in transit is slightly higher than highways/roads. This is largely because several large transitways, including the Green Line Extension, Blue Line Extension, and Gold Line are included in the TIP years.

Figure 3: Approximate Amount Programmed by Primary Mode Served.

Many highway projects include significant bicycle and pedestrian elements such as trails, sidewalks, streetscape improvements and dedicated bike lanes and shoulders. The costs of these elements are not allocated to “Bike/Ped Only” in this figure. Overall spending on bicycle and pedestrian infrastructure is higher than reflected in the “Bike/Ped Only” figure, which is the approximate sum of funds for projects dedicated solely for bicyclists and/or pedestrians. “Other/Set-asides” include all projects that do not directly serve a mode such as right-of-way purchase or environmental work.

Highways and Roads

The traditional highway funding sources available to the region are summarized in Table 14. The four-year total is approximately \$3.9 billion and includes \$1.4 billion of federal formula funds and \$691 million of state highway funds.

MnDOT also uses the advanced construction (AC) process to extend its available resources. MnDOT constructs federal aid projects in advance of the apportionment of authorized federal aid funds. MnDOT has to meet a number of conditions to use the AC process. MnDOT can commit future federal funds to projects as long as they go through the normal FHWA approval and authorization process. The projects using AC must be fully encumbered in the state budget for both the amount of state funds and the federal AC amount. The state funds available at contract letting must be 100% of the local match of federal funds. This is normally 10 or 20 percent of the project costs. The AC amounts must be shown in the TIP (The detailed tables in Appendix A identify AC by project.). The AC must be shown in the year incurred and in each year the conversion takes place. Sufficient cash must exist to make project payments until AC is converted or the amount of work to be undertaken in a given construction season that does not exceed the actual federal funds available for that year. The AC funds that will be used by the region by year are shown in Table 12.

Table 12: Advanced Construction Funds (Millions)

This table will be updated in the final TIP

Local funds are necessary to match the federal transportation funds. Most of the projects on the trunk highway system are matched with trunk highway funds included in the targets and not in the local match figure. In all other cases, the federal funds are matched by city or county funds, regional transit capital or operating funds, or funds from other agencies such as the Minnesota Department of Natural Resources. At a minimum, these funds represent 20 percent of the project cost (aside from HSIP, which requires a 10 percent non-federal match), although this can be significantly higher. Local funding represents \$795 million over four years.

Transit

Transit funds available to the region in 2026-2029 are summarized in Table 15. Included are federal transit funds and regional capital bonds used to match federal funds. This table does not show any highway funds allocated to transit. An estimated \$1.2 billion in federal transit funds will be received by the region in the next four years.

The region generates transit capital and operating funds from four principal sources: fares, the state motor vehicle sales tax for operations, regional property taxes dedicated to repaying bonds that fund capital projects, and state general funds that are directed to the region's ADA service, regular transit service, or to repay state bonds for transit projects. Suburban transit providers⁴ may also use local general fund money to subsidize operating cost or to match federal funds. Regional Capital Bonds and other local funds of \$1.4 billion will be used to match federal transit funds (including Section 5309) and to locally fund various transit capital investments.

⁴Twelve cities have elected to provide their own transit service. Through agreements and consolidations, the region includes four suburban transit providers (SW Transit, MVTA, Maple Grove and Plymouth).

Table 13: Twin Cities Transportation Improvement Program; Four-Year Summary by Funding Source

<i>Federal Highway</i>		
Target	\$1.44B	\$1.80 Billion
Congressionally Directed Funds	\$43M	
Misc. Federal Funds	\$295M	
Additional MnDOT Allocation	\$20M

Project Selection Processes and Criteria

The sources of federal transportation funds that come to the region are summarized in Table 16, along with the processes followed for project selection and the agency that is responsible for each selection process. These processes are described on the following pages.

Table 16: Summary of Federal Project Funding Categories and Selection Processes

Funding Category	Project Selection Process Followed
Congressionally Directed Spending (CDS)	Selected and appropriated by Congress
National Highway Performance Program (NHPP)	MnDOT Metro District Process with guidance from Capital Improvement Committee (CIC).
National Highway Freight Program (NHFP)	MnDOT Central Office process.
Surface Transportation Block Grant (STBG) Program	Federal funding program that accommodates projects on any roads that are not functionally classified as local or rural minor collectors, along with pedestrian projects, recreational trails, and Safe Routes to School projects. Bridge projects may be on any public road. Includes Transportation Alternatives Program (TAP), which is primarily used for bicycle, pedestrian, and Safe Routes to School projects in the TIP. Some STBG Program funding is distributed through a competitive solicitation process conducted by TAB while other funding is distributed by MnDOT.
Congestion Mitigation and Air Quality Improvement (CMAQ) Program	Federal funding program that funds projects that will contribute air quality improvements or provide congestion relief. Funding is distributed through the competitive regional solicitation process.
Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT)	Federal funding program aimed at building resiliency to natural hazards and disasters. 2024 – 2027 funds were distributed through the Regional Solicitation while distribution for future-year funds will be decided upon in the future.
Carbon Reduction Program (CRP)	Federal funding program to fund projects that will help reduce transportation-related air pollution, defined as carbon dioxide (CO ₂), from on-road highway sources. Funds are distributed through the Regional Solicitation.
Bridge Funding Program	Federal funding aimed at bridges both on and off the federal aid system. Many 2024 – 2026 funds were distributed through the Regional Solicitation while distribution for future-year funds will be decided upon in the future. The program is not assumed to continue beyond the end of IJA (2026).
Highway Safety Improvement Program (HSIP)	Federal funding program aimed at reducing traffic fatalities and serious injuries. Some HSIP funding is distributed through a competitive solicitation process conducted by MnDOT and TAB while other HSIP funding is distributed by MnDOT. The Highway Rail Grade Crossings & Rail Safety program is included in this category.
Miscellaneous Federal Funding Programs	Less frequently used programs including Bridge Replacement Off-System (BROS) and Federal Land Access Program (FLAP).
FTA Section 5307	Regional Transit Capital Improvement Program (CIP) developed by Metropolitan Council with regional transit provider assistance
FTA Section 5309	Selected and appropriated by Congress
FTA Section 5310	MnDOT Office of Transit/statewide competitive process
FTA Section 5311	MnDOT Office of Transit/categorical allocation
FTA Section 5337 and 5339	Regional Transit Capital Improvement Program (CIP) developed by Metropolitan Council

Project Selection Process for Additional Federal Highway Funds by MnDOT Metro District with Assistance from the Capital Improvement Committee

MnDOT Metro District, with guidance from its partners through the Capital Improvement Committee (CIC), identifies and selects projects on the state trunk highway system to be funded using National Highway Performance Program (NHPP) funds and included in the TIP. The CIC's membership includes representation from MnDOT Metro District, the TAB, the Metropolitan Council, and six representatives of the TAB's Technical Advisory Committee (TAC). The CIC discusses project programming, coordination, and timing issues for MnDOT Metro District leadership (in the Metro District Program Committee) and the TAC Funding and Programming Committee. Investment decisions with statewide impacts may be elevated to the Transportation Program Investment Committee (TPIC) for consideration. TPIC membership includes the Metro District Engineer and other agency-wide leadership.

The Metropolitan Council and MnDOT have cooperatively identified priorities to be used in the selection of major projects to be included in the TIP. The priorities and projects are drawn from the TPP and the [Minnesota State Highway Investment Plan \(MnSHIP\), 2023-2042](#). Investments and specific projects are identified consistent with priorities outlined in those plans, which over the next 10 years focus primarily on preservation of existing infrastructure with other investments in safety, bicycle/pedestrian facilities, and highway mobility.

Competitive Regional Solicitation Project Selection Process

The Metropolitan Council and its Transportation Advisory Board (TAB) conduct a competitive process for the selection of local projects for federal funding and incorporation into the TIP. The process, known as the Regional Solicitation, was designed by the region's partners to help the region implement its plans and high priority projects and programs. TAB's Regional Solicitation allocates approximately 18 percent of the federal funds that are available to the region. The Regional Solicitation process directs federal funds to a variety of locally initiated projects that meet regional transportation needs. These locally initiated projects must be consistent with the region's TPP. Projects using STBG, CMAQ, PROTECT, and HSIP funds are selected through the Regional Solicitation process. The priorities for project selection are based on the goals and policies in Imagine 2050 and Transportation Policy Plan.

Regional Solicitation Development

The Regional Solicitation has been conducted roughly every other year since the early 1990s. It has been in its present form since 2014, when TAB selected prioritizing criteria. Each two-year cycle includes a public comment period in the months leading up to finalization of the Solicitation. See the 2024 [Regional Solicitation Public Comment Report](#).

The 2024 Regional Solicitation selected projects for federal highway funding primarily in program years 2028 and 2029 in the following categories:

- Roadways Including Multimodal Elements
 - Traffic Management Technologies
 - Spot Mobility and Safety
 - Roadway Strategic Capacity
 - Roadway Reconstruction and Modernization
 - Bridges
- Bicycle and Pedestrian Facilities
 - Multiuse Trails and Bicycle Facilities
 - Pedestrian Facilities (Sidewalks, Streetscaping, and ADA)
 - Safe Routes to School (Infrastructure Projects)

- Transit and Travel Demand Management
 - Arterial Bus Rapid Transit
 - Transit Expansion
 - Transit Modernization
 - Travel Demand Management
- Unique Projects
- Highway Safety Improvement Program (HSIP) (Directly administered by MnDOT)

Qualifying and prioritizing criteria, used to evaluate each project, vary by mode and category. The evaluations produce a score and category ranking for each project, based on the project's anticipated performance for each prioritizing criterion. The qualifying and prioritizing criteria were developed consistent with, and for the purposes of, implementing regional transportation priorities and plans. Examples of qualifying criteria and prioritizing criteria are listed below.

Scoring committees, comprised of local partners, state agency staff, and Metropolitan Council staff evaluate and rank all categories of projects for the Regional Solicitation. Recommended projects are reviewed and approved by the Funding and Programming Committee, which, using the scoring committee rankings, recommends funding allocation options to be considered by TAC and recommended to TAB. TAB approves a list of projects and funding allocation developed through the Regional Solicitation process and the Metropolitan Council concurs with the list of projects.

While the assigned scores differentiate the projects within each funding category, how many projects to fund within each category needs to be decided separately. Following scoring evaluation, TAB, with the assistance of TAC and the TAC Funding & Programming Committee, considers "funding options" to determine how many projects to fund from each funding category. These options are shown as themes, such as following historic modal distribution, funding more (lower-cost) projects, assuring projects are funded in each county, favoring modernization over expansion, and focusing on a particular mode. Some parameters, such as a range of funds to be dedicated to each mode, are set prior to release of the Regional Solicitation.

The HSIP projects are evaluated and awarded funds through a process administered by MnDOT Metro District. TAB reviews and approves the criteria MnDOT develops for HSIP project evaluation along with the prioritized list of projects for funding.

Examples of Qualifying Criteria

- The project must be consistent with the policies of Imagine 2050 and the region's Transportation Policy Plan, adopted by the Metropolitan Council.
- The project must implement a solution to a transportation problem discussed in a local or county comprehensive plan and/or in an approved Capital Improvement Program (CIP) of a local, regional, or state agency.
- The proposer must show that the project has been coordinated with all affected cities and counties, the appropriate transit operator, and other levels of government.
- Public agency sponsors must either have a current Americans with Disabilities Act (ADA) self-evaluation (for those that employ fewer than 50 people) or transition plan (for those that employ 50 or more people) that covers the public right of way/transportation, as required under Title II of the ADA.

Examples of Prioritizing Criteria

- Role in the regional transportation system and economy
- Current or potential usage
- Infrastructure age
- Congestion reduction and air quality
- Multimodal facilities and existing conditions
- Risk assessment
- Cost effectiveness

Council staff is currently evaluating the Regional Solicitation and the funding categories and evaluation criteria may change prior to release of the 2026 Regional Solicitation.

Regional Solicitation Selected Projects

A summary of the federal funding allocated by category through the Regional Solicitation process is shown in Table 17. This table reports only the federal funds allocated to the projects and does not include the local match.

Table 17: Summary of Federal Funding Allocated through the TAB's Regional Solicitation for Projects in State Fiscal Years 2026-2029 (In millions; Federal Amount only)

Program Category	2026	2027	2028	2029	Total
Congestion Mitigation Air Quality (CMAQ)	\$48.9	4.4	33.5	33.5	120.3
Transportation Alternatives (TA)	\$16.8	24.3	21.7	16.1	78.9
PROTECT	\$0	4.7	4.8	5.1	14.6

Surface Transportation Program (STP)	\$51.0	81.1	70.4	82.6	285.1
Highway Safety Improvement Program (HSIP)	\$21.3	22.6	14.7	10.2	68.9
TOTALS	\$146.3	143.7	146.1	147.5	583.6

Figure 4: 2024 Regional Solicitation Selected Projects

Figure 5: 2024 HSIP Regional Solicitation Selected Projects

Transit Project Selection for Sections 5307, 5337, and 5339 Capital Investment Grants Program Funding

Federal transit funds come to the Metropolitan Council as the designated federal recipient for the region. The Council uses the federal funds for regional provider bus, light rail vehicle, and locomotive purchases; bus and rail vehicle rebuilding; shelters; garages; guideway improvements such as shoulder bus lanes, light rail track and systems; and maintenance and operations. These projects are identified in the Council's six-year Capital Improvement Program, which is a tool used to implement the regional transportation plan, with regional transit provider assistance. The Council also submits projects for funding with federal transit funds and Regional Capital Bonds.

Transit Project Selection for Section 5309 Capital Investment Grants Program Funding

Capital Investment Grant (Section 5309) funding is discretionary federal funding that is appropriated directly to projects by Congress. These projects are identified in the region's Transportation Policy Plan in coordination with local partners, who often lead the early planning efforts, and with the implementing agencies, usually the Council through its operating division, Metro Transit.

Transit Project Selection for Sections 5310 and 5311 Funding

Federal Transit Administration (FTA) Section 5310 and 5311 funds are allocated by MnDOT's Office of Transit. Section 5310 funds are competitively allocated through a statewide process to non-profit agencies for vehicles. Projects are selected annually so each year the TIP is revised or amended and a new list of projects is included for the next fiscal year. Section 5311 allocates operating funds for small city transit service. There are three transit services in the region that receive funds.

Balance of Selected Projects with Available Financial Resources

The IIJA requires that the region's TIP must be consistent with funds reasonably expected to be available. This is called fiscal constraint and means the projects recorded in the TIP cannot significantly exceed expected revenues.

For federal and state highway funding, the state and region have agreed on a process that ensures a balance exists between federal highway funding resources and expenditures as discussed at the beginning of Chapter 3. The highway project program costs identified in Table 18 for 2026 to 2029 closely match the funds available as shown in Table 14, and the highway project program costs identified in Table 19 for State Fiscal Year 2026 closely match the funds available as shown in Table 14. Anticipated highway revenues balance with expenditures and demonstrate fiscal constraint.

For federal, state, and regional transit funding, federal guidance requires transit funds match the approved project costs in the TIP. The projects funded with federal transit and local matching funds for 2026 have a total value of approximately \$417 million (Table 15).

State Highways and Local Transportation Operations and Maintenance

MnDOT and metro area cities and counties are able to fund the maintenance and operations of the region's highway system over the course of the 2026-2029 TIP. MnDOT and metro area cities and counties can fund the maintenance and operations of the region's highway system over the course of the 2026-2029 TIP. The 2050 TPP forecasts \$15 billion in spending for rebuilding and replacing pavement, bridge, and roadside infrastructure between 2025 and 2050.

Consistency with the Regional Transportation Plan and Priorities

All projects in the TIP must be consistent with the region's [2050 Transportation Policy Plan \(TPP\)](#). The region's transportation goals are:

- Our communities are healthy and safe. All our region's residents live healthy and rewarding lives with a sense of dignity and wellbeing.
- Our region is dynamic and resilient. Our region meets the opportunities and challenges faced by our communities and economy including issues of choice, access, and affordability.

- We lead on addressing climate change. We have mitigated greenhouse gas emissions and have adapted to ensure our communities and systems are resilient to climate impacts.
- We protect and restore natural systems. We protect, integrate, and restore natural systems to protect habitat and ensure a high quality of life for the people of our region.
- Our region is equitable and inclusive. Racial inequities and injustices experienced by historically marginalized communities have been eliminated; and all people feel welcome, included, and empowered.

The TPP contains lists of short- and long-range transportation projects programmed from 2025 through 2050. The projects identified in this TIP are either programmatically or specifically identified in the TPP adopted by the Metropolitan Council on February 12, 2025. See the TPP on the [Metropolitan Council's website](#).

Plan Implementation Progress

Status of Major Projects

Federal TIP guidance requires the progress made on implementing the region's transportation plan be reported annually. Tables 20 and 21 and Figure 6 identify the major highway and transit projects in the 2026-2029 TIP, cost, and status of each. In recent years, major projects obligated (and, therefore, not included in this TIP) include:

- [I-494 MnPASS and Directional Ramp](#). Construction began in 2023. Completion is expected in 2026. (Project 1 on Table 20)
- [US 212 Lane Expansion/Overpass in Benton Township](#). (Project 10 on Table 20)
- [Replacement of the Kellogg Avenue / Third Street Bridge](#). (Project 4 on Table 20)
- [I-35W Construction in Burnsville](#). Completion is expected in Fall 2026 (Project 5 on Table 20).
- [US 10 interchange construction at CSAH 56 \(Ramsey Blvd NW\) and CSAH 57 \(Sunfish Lake Blvd NW\) in Ramsey](#) over BNSF railway and adjacent frontage roads. Construction started in 2023 and completion is expected in 2025. (Project 7 on Table 20)
- I-394 and I-94 Bridge Rehabilitation. Completion is expected in 2027. (Project 12 on Table 20)
- [Metro E Line Arterial Bus Rapid Transit](#) is targeted to open in December 2025. (Project 19 on Table 21)
- [MN 5 Chanhassen to Victoria](#). Completion is expected in 2027. (Project 15 on Table 20)
- I-94 Albertville to Monticello. Completion expected in late 2026 / early 2027 (Project 16 on table 20)

During the past year, construction was completed on the following major projects (Projects no longer included in Table 20 or 21):

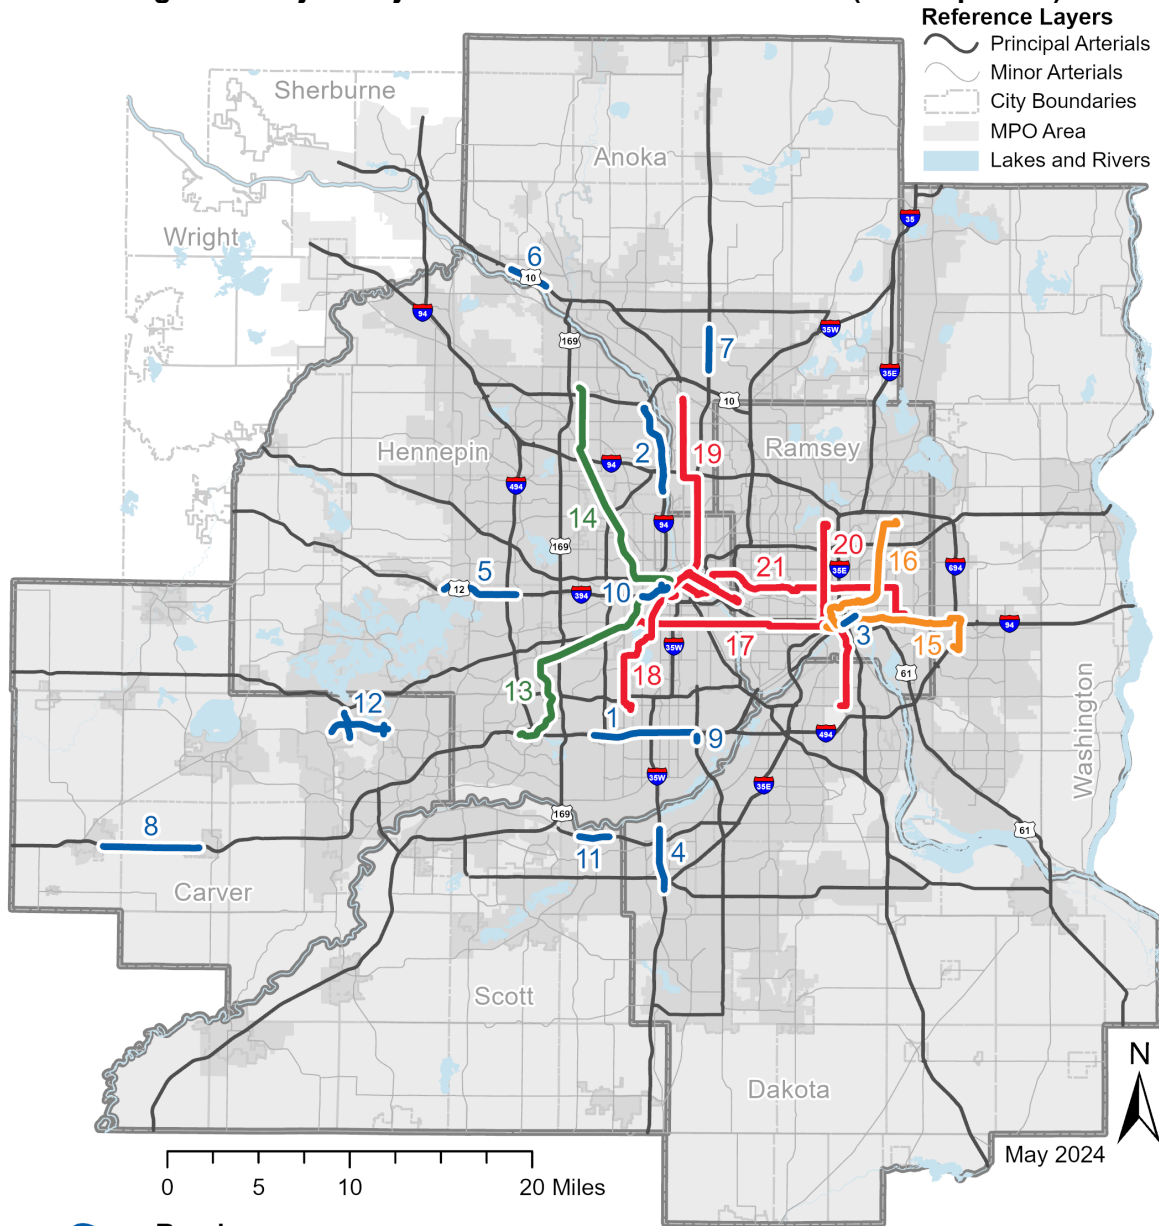

- [METRO Gold Line BRT](#). Operations started in Spring of 2025.
- [Metro B Line \(Lake/Marshall/Selby\) Arterial BRT](#). Scheduled opening on June 14, 2025.

The following major projects are being included in the TIP for the first time:

- I-494 Mobility and Bridges (Project 2 on Table 20)

All the major projects are either specifically included in the region's Transportation Policy Plan or are consistent with the Plan's policies.

Figure 6: Major Projects Shown in Tables 20 and 21 (to be updated)

21. METRO H Line (Como/Maryland) ABRT

Table 20: Status of Major Highway Projects

Project	Cost Estimates	Year of Last SP#	Project Status/Comments
1. I-494 MnPASS and Directional Ramp (2785-424; 2785-424C; 2785-424G)	\$377,000,000	2023	Eastbound MnPASS lane from France Ave to MN 77 and westbound MnPASS lane from MN 77 to I-35W. Bush Lake Road to I35W, first phase of interchange (I-35W northbound to westbound I-494). Construction Start: 2023. Construction Complete: 2026
2. I-494 Mobility and Bridges (2785-462)	\$368,100,000	2027	MnPASS, reconstruct five bridges and rehabilitate four bridges from US 169 to MN 100, Penn Ave to 34th Ave in Bloomington and I-35W from 86th St in Bloomington to 76th St in Richfield. Construction Start: Unknown. Construction Complete: Unknown
3. MN 252 and I-94 (2748-65, 110-010-010, 027-709-029)	\$162,152,715	2029	MN 610 to Dowling Avenue. Convert MN 252 to Freeway and install MnPASS lanes The three project lines total \$162,152,715 in the TIP.
4 Kellogg Ave / 3rd Street (164-158-028)	\$60,737,180	2024	MSAS 158 (Kellogg/3 rd St) from Broadway St to near Maria Ave in St. Paul – Replace bridges Construction Start: 2024. Construction Complete: 2026/2027
5. I-35W Construction in Burnsville (1981-140, 1981-140BFP, 1981-140N, 1981-140S, 1981-140TR)	\$80,000,000	2025	Resurface and replacement of three bridges Construction Start: 2025. Construction Complete: 2026
6. US 12 Pavement (2713-129, 2713-129PRO)	\$50,854,000	2026	In Wayzata and Minnetonka – Pavement rehab, lighting, drainage improvements, ADA, pier protection Construction Start: 2026. Construction Complete: 2027.
7. US 10 Interchanges in Ramsey	\$91,500,000	2023	New US 10 interchange at Ramsey Blvd NW and Sunfish Lake Blvd over BNSF railway in Ramsey Construction Start: 2023. Construction Complete: Spring 2026

Project	Cost Estimates	Year of Last SP#	Project Status/Comments
8. MN 65 Grade Separations in Blaine (106-010-020, 0208-169TED, 0208-169, 0208-169R, 0208-169A, 002-612-033, 002-596-028, 002-612-033, 106-101-012, 106-109-010)	\$167,000,000	2026	Grade separation and frontage road on Minnesota 65 (Central Ave) at CSAH 12 (109th Ave) and 105th Ave in Blaine Construction Start: 2027. Construction Complete: TBD.
9. MN 65 Grade Separation in Ham Lake and Blaine (002-716-026)	\$40,095,000	2028	Grade separation at CSAH 116 and frontage roads and trail on Central Ave from 131st Ave to 139th Ave in Ham Lake and Blaine Construction Start: TBD. Construction Complete: TBD.
10. US 212 Lane Expansion / Overpass in Benton Township (010-596-013, 010-596-013F, 010-596-013PRO, 1013-77)	\$71,000,000	2024	Lane expansion including a new overpass at CSAH 51 with right-in/right-out access Construction start: 2024 Construction Complete: 2026.
11. MN 77 Bridge Rehabilitation (2758-75)	\$51,698,000	2026	Maintenance and reconstruction on five bridges on Minnesota 77 in Bloomington Construction start: 2026. Construction Complete: 2027.
12. I-394 and I-94 Bridge Rehab (2789-174)	\$79,222,000	2025	Rehabilitation of 25 bridges on I-394 and six bridges on I-94 in Minneapolis Construction start: 2025. Construction Complete: 2027.
13. MN 13 Savage to Burnsville (1901-203, 179-121-026, 070-596-018, 211-010-009)	\$120,408,000	2027	Reconstruction, grade separation, signals, multiuse trail, new bridges Construction start: TBD. Construction Complete: TBD.
14. MN 13 in Burnsville (179-010-016, 179-010-016PRO)	\$91,437,228	2028	Reconstruction, grade separation, trail. Construction start: TBD. Construction Complete: TBD.
15. MN 5 Chanhassen to Victoria (010-596-016, 010-596-014, 010-596-019, 241-090-001, 1002-124)	\$78,183,000	2025	Two-lane to four-lane conversion, signals, median, pedestrian bridge, Trail, bridge, underpass Construction start: 2025. Construction Complete: 2027.
16. I-94 Expansion; Albertville to Monticello (8680-189)	\$76,000,000	2024	Expansion from two to three lanes. Construction start: 2025. Construction Complete 2026/2027.

Key to Tables

The tables are broken into the various "most likely" funding categories and are sorted by: Local/MnDOT, Agency, Trunk Highway, and State Project Number. The description of each column is shown below.

Yr	The state fiscal year the project is scheduled to be let.
PRT	The major ("parent") project this project is a part of - see attached list.
Route	The highway the project is located on. A "999" means multiple routes or a location has yet to be determined.
Proj Num	The TIP project number.
Prog	MnDOT Program categories
	<div> AM: Municipal Agreement B9: FTA Urbanized Area Formula – Section 5307 BI: Bridge Improvement and Repair BT: Bike Trail CF: Clean Fuels – Section 5308 EN: Enhancement LP: Local Partnership MC: Major Construction NB: FTA Elderly & Persons w/ Disabilities – Sec 5310 PL: Planning RB: Rest Area/Beautification RD: Reconditioning RW: Right of Way Acquisition SA: Supplemental Agreement and Cost Overrun RX: Road Repair (Bridge-Road Construction (BARC)) SH: Highway Safety Improvement Program </div> <div> B3: FTA Capital Program - Sec 5309 BB: Bus and Bus Facilities BR: Bridge Replacement CA: Consultant Agreement DR: Drainage GR: State of Good Repair MA: Miscellaneous Agreement NO: Noise Walls PM: Preventive Maintenance RC: Reconstruction RS: Resurfacing SC: Safety Capacity Improvements SR: Safety, Rail TM: Traffic Management TR: Transit </div>
Description	The location and work to be accomplished by the project.
Project Total	Total estimated cost of project.
FHWA \$ or FTA \$	Federal funding for the project.
DEMO \$	Total federal demonstration funding for the project.
AC \$	Funding to be reimbursed in a future program year.
State \$	MnDOT state funding for the project.
Other \$	Total contribution from the local agency involved in the project.
Agency	The agency with jurisdiction over the project.
RS	Regionally significant projects are denoted with "RS" in this column.

MnDOT Metro District Construction Projects

2026-2029 Parent Projects

This table will be in the final TIP.

APPENDIX B

TRANSPORTATION IMPROVEMENT PROGRAM (TIP) AMENDMENTS: STREAMLINED PROCESS (ADOPTED BY TAB: FEBRUARY 19, 2020)

Conditions for Using a Streamlined Amendment Process

A TIP amendment request can be streamlined if it meets all of these criteria:

- 1) The project is consistent with the adopted Transportation Policy Plan.
- 2) The project is not a regionally significant project* (as defined in the adopted Transportation Policy Plan) or is a regionally significant project currently in the TIP but is not changing in any way that will impact the regional significance of the project.
- 3) The project does not relate to a formal scope change (per the Transportation Advisory Board's Scope Change Policy) before the committee.

Process

For projects in the PM₁₀ maintenance area, the Minnesota Interagency Air Quality and Transportation Planning Committee will, in its review of the project for air quality conformity determination; any amendments involving changes unable to be exempted from an air quality conformity determination will be deemed regionally significant. If the project meets the three criteria described above, Metropolitan Council staff prepares an action item for Transportation Advisory Committee (skipping TAC Funding and Programming Committee). The item will be discussed at the TAC Executive Committee prior to TAC. If approved by TAC, the action item will be placed on the consent agenda for TAB, Transportation Committee, and the Metropolitan Council. Information about streamlined amendments shall be presented as information to the Funding and Programming Committee.

NOTE: No part of the Twin Cities Metro Area is in a PM₁₀ maintenance area. The entire area is in attainment.

APPENDIX C

EASTERN FEDERAL LANDS HIGHWAY DIVISION PROJECTS

The Eastern Federal Lands Highway Division (EFLHD) of the Federal Highway Administration (FHWA) will provide an annual TIP update with projects that are primarily implemented with the boundaries of the Federal Land Management Agency (FLMA) units located in Minnesota. Projects in the MPO planning area will be added here when that is provided, most likely after the TIP is approved by the United States Department of Transportation (USDOT). The Federal requirement under Title 23 U.S.C. § 204 requires that the TIP be developed as part of the transportation planning process for all Federal Lands projects.
