

Business Advisory Committee

May 25, 2016

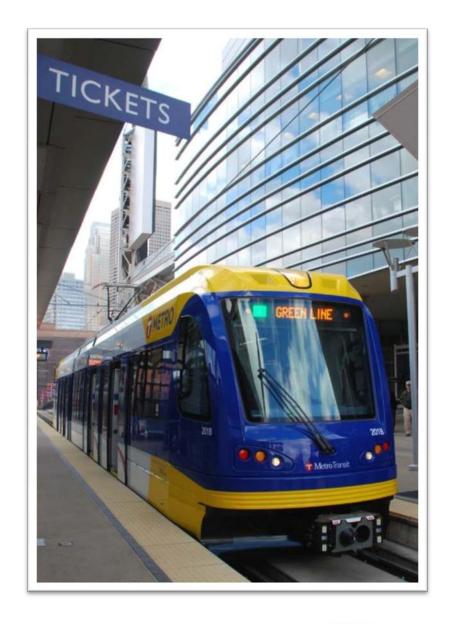

Today's Topics

- Welcome/Approval of Meeting Summary
- Legislative Wrap-Up
- FEIS Update
- Station Design Update
- EPC Meeting with Lt.
 Gov. Tina Smith
- Member/Committee
 Reports/Public Forum

FEIS Update

Previous Studies

- Southwest Transitway Alternatives Analysis (2005-2007):
 - Identified Locally Preferred Alternative (LPA) LRT through Kenilworth-Opus-Golden Triangle alignment
- Scoping (2008-2009):
 - Determined alternatives to be considered in DEIS
 - Concluded 5 LRT alternatives would be examined in DEIS
- Draft Environmental Impact Statement (2010-2012):
 - Evaluated 5 LRT, Enhanced Bus and No Build alternatives
 - Documented anticipated impacts, costs and benefits
- Supplemental DEIS (2015):
 - Evaluated adjustments made to project since publication of DEIS in portions of Eden Prairie, St. Louis Park, Minneapolis and the proposed OMF in Hopkins

FEIS Released May 13, 2016

- Purpose and need for the Project
- Alternatives considered
- Anticipated impacts from the Project, including avoidance, minimization, and mitigation measures
- Description of the Project's public involvement and agency coordination
- Project's proposed finance plan
- Comments received during the Draft EIS, Supplemental Draft EIS, and Amended Draft Section 4(f) Evaluation
- Responses to comments

FINAL ENVIRONMENTAL IMPACT STATEMENT

Volume 1 of 16

Front Matter, Executive Summary, Chapters 1–10

MAY 2016

Project Purpose and Need

- Improve access/mobility to job and activity centers
- Provide a competitive, cost-effective travel option
- Be part of an efficient system of integrated regional transitway system serving the Twin Cities
- Primary factors that make project important for people who live and work in southwest metro area:
 - Declining mobility
 - Limited competitive, reliable transit options
 - Need to maintain a balanced and economically competitive multimodal freight system
 - Regional/local plans calling for investment in additional light rail projects in the region

FEIS Alternatives & Categories Evaluated

FEIS Alternatives Considered

- Southwest LRT Project
 - Locally Preferred Alternative (LPA): 14.5 miles of new double track along the Kenilworth-Opus-Golden Triangle alignment
 - Co-location of freight rail and light rail in the Kenilworth Corridor (LRT 3A-1)
 - Locally Requested Capital Investments: proposed improvements undertaken separate from, but contingent upon, implementation of the LPA
- No Build Alternative
 - Future conditions with other planned transportation projects included in the 2040 Transportation Policy Plan, except for the Southwest LRT Project

Environmental Categories Analyzed

- Impacts associated with No Build Alternative and Project for the following areas:
 - Land Use
 - Economic Activity
 - Neighborhoods/Communities
 - Acquisitions/Displacements
 - Cultural Resources
 - Parks, Rec and Open Spaces
 - Visual Quality/Aesthetics
 - Geology/Groundwater Resources
 - Surface Water Resources

- Ecosystems
- Air Quality/Greenhouse Gases
- Noise and Vibration
- Hazardous/Contaminated Materials
- ElectromagneticInterference/Utilities
- Energy

Transportation

- Impacts associated with No Build Alternative and Project for the following areas:
 - Transit
 - Roadway/Traffic
 - Parking
 - Freight Rail
 - Pedestrian/Bicycle
 - Safety/Security

Other Analysis

- Environmental Justice Compliance: Ch. 5
- Section 4(f) Evaluation: Ch. 6
- Section 106: App. H
- Financial Analysis: Ch. 7

Impacts, Commitments and Mitigation

- Identifies impacts of each category:
 - Long-term direct
 - Long-term indirect
 - Short-term (construction)
 - Cumulative
- Identifies mitigations and commitments
- Summarizes in a table by category, provides detail in sections of the FEIS

Category	Long-term Direct Impacts	
	Long-term Indirect Impacts	
	Short-term Impacts	
	Commitments	
	Mitigation Measures	

Overview of Select Categories

Acquisition/Displacements

- Issues: Loss of local businesses, loss of taxbase
- Measures to avoid, minimize and mitigate impacts
 - Design refinements to avoid private property
 - Compensate property owners for property per state/federal laws
 - Provide relocation benefits for displaced businesses/nonprofits per state/federal laws

Parks and Trails

- Issues: Visual impacts, trail location and condition, construction activities, safety
- Measures to avoid, minimize and mitigate impacts:
 - Design adjustments to reduce ROW impacts to parks
 - Restore parks altered or disturbed during construction to original conditions, or better
 - Continue coordination with park owners
 - Include way-finding, regulatory and warning signage
 - Provide trail markings at intersection to address conflicting movements at station areas
 - Provide signed detour routes during construction

Noise

- Issues: Noise from LRT operations (bells/horns), construction activities
- Measures to avoid, minimize and mitigate impacts:
 - Incorporate directional wayside bells
 - Intrusion detection incorporated at tunnel portals to eliminate train horns under normal operations
 - Construct tunnels and sound walls
 - Provide for quiet zones
 - Include wheel skirts on LRVs
 - Provide continuously welded rail
 - Provide parapet walls and rail dampers
 - Adjust construction activities and methods

Vibration

- Issues: Vibration from LRT operations, construction activities
- Measures to avoid, minimize and mitigate impacts:
 - Install resilient rail fasteners in Kenilworth tunnel
 - Conduct pre-construction surveys
 - Limit high-vibration construction activities

Traffic

- Issues: Additional congestion, intersection backups, lane closures/detours during construction
- Measures to avoid, minimize and mitigate impacts
 - Design project to avoid new or worsened traffic impacts at intersections, compared to No Build Alternative
 - Include roadway/intersection improvements as part of the project
 - Develop a Construction Communication Plan to address short-term impacts
 - Provide advance notice and communicate construction activities through a variety of platforms, outlets

Safety and Security

- Issues: At-grade crossings, emergency vehicle access, stations, LRT proximity to freight rail
- Measures to avoid, minimize and mitigate impacts
 - Implement appropriate crossing controls such as flashing lights with audible warnings and gates
 - Ensure continued access for emergency vehicles and coordinate with emergency service providers
 - Design stations with appropriate lighting, emergency equipment and security features
 - Implement corridor protection barriers and intrusion detection, where applicable
 - Implement Safety and Security Management Plan and LRT Design Criteria to provide and maintain safety

Environmental Justice Analysis

- Documents regulatory context and methodology
- Identifies and maps minority and low-income EJ populations
- Discusses public involvement
- Provides analysis for environmental categories that could potentially impact EJ populations
- Presents EJ finding:

"Taking into account adverse impacts on EJ populations, committed mitigation measures, and benefits to EJ populations, the Council and FTA have concluded that the Project as a whole would not result in disproportionately high and adverse impacts to EJ populations."

Section 4(f) of the Dept. of Transportation Act

- Protects publically owned parks, recreation areas, wildlife and/or waterfowl refuges, and public/private historic sites as part of transportation project development
- Summary of SWLRT Section 4(f) Evaluation:
 - Draft Section 4(f) Evaluation published in Draft EIS
 - Draft Section 4(f) Evaluation Update published in Supplemental Draft EIS: evaluated project adjustments and preliminary 4(f) determinations
 - Amended Draft Section 4(f) Evaluation published separately: evaluated two newly identified 4(f) properties in Minnetonka
 - Final Section 4(f) Evaluation published in Final EIS

Final Section 4(f) Evaluation

Section 4(f) Property	Property Type	Official with Jurisdiction	Non-de minimis Use	De minimis Use	Temporary Occupancy: No Use
Purgatory Creek Park	Park	City of Eden Prairie			•
Unnamed Open Space B	Park	City of Minnetonka		•	
Opus Development Area Trail Network	Park	City of Minnetonka		•	
Minikahda Club	Historic	MnHPO			•
Cedar Lake Parkway/Grand Rounds Historic District	Historic	MnHPO			•
Kenilworth Lagoon/Grand Rounds Historic District	Historic	MnHPO	•		
Kenilworth Channel/Lagoon (as an element of the Minneapolis Chain of Lakes Regional Park)	Park	MPRB		•	
Cedar Lake Park	Park	MPRB			•
Bryn Mawr Meadows Park	Park	MPRB		•	
St. Paul, Minneapolis & Manitoba Railroad Historic District	Historic	MnHPO		•	

Draft Section 106 Memorandum of Agreement (MOA)

- Provides measures to avoid an adverse effect on 14 historic properties
- Provides mitigation measures for an adverse effect on five historic properties
- Grand Rounds Historic District
- Kenilworth Lagoon
- Chicago, Milwaukee, St. Paul & Pacific Railroad Dept
- Two archaeological sites
- Assigns responsibility of carrying out terms of the agreement to the Met Council with FTA oversight

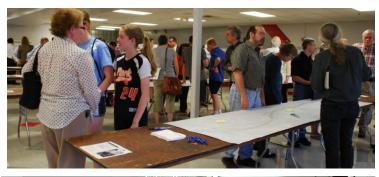

Draft Section 106 MOA Stipulations

- Grand Rounds Historic District (GRHD)/Kenilworth Lagoon
 - Noise mitigation: parapet wall and rail damper on LRT bridge
 - Continued consultation on final bridge design
 - Restoration/rehabilitation of portions of WPA wall
 - Prepare guidance for future preservation activities within the GRHD canal system

DEIS & SDEIS Comments

- FEIS responds to all comments submitted during the DEIS and SDEIS public comment periods:
 - DEIS: appox. 1,000 comments
 - SDEIS: approx. 225 comments
- Comments received:
 - From individuals, businesses, public interest groups, local governments/jurisdictions, state/federal agencies
 - Through public hearings, email, postal mail

Environmentally Preferred Alternative

Locally Preferred Alternative, LRT 3A-1 (colocation), including Shallow LRT Tunnels – Over Kenilworth Lagoon

"As a result of the design adjustments that occurred after publication of the Draft EIS, the colocation of light rail and freight rail in the Kenilworth Corridor (LRT 3A-1) is the Project's environmentally preferred alternative."

Next Steps

Next Steps

- Comment period to receive comments on adequacy of FEIS under MEPA (Minn. Rule 4410.2800, subp. 4)
- FEIS is adequate if it:
 - Addresses the potentially significant issues and alternatives raised in scoping
 - Provides responses to the substantive comments received during the draft EIS review concerning issues raised in scoping
 - Was prepared in compliance with environmental rules (parts 4410.0200 to 4410.6500)

Next Steps (cont.)

- FTA issues Record of Decision (ROD)
 - Documents agency's decision and basis for decision
 - Itemizes and adopts mitigation commitments
 - Documents compliance with environmental review process, including:
 - Section 4(f)
 - Section 106
 - Clean Water Act
 - OClean Air Act
- Met Council issues Adequacy Determination (MEPA)
- Obtain federal, state, local permits/approvals

Station Design Update: Station Panels

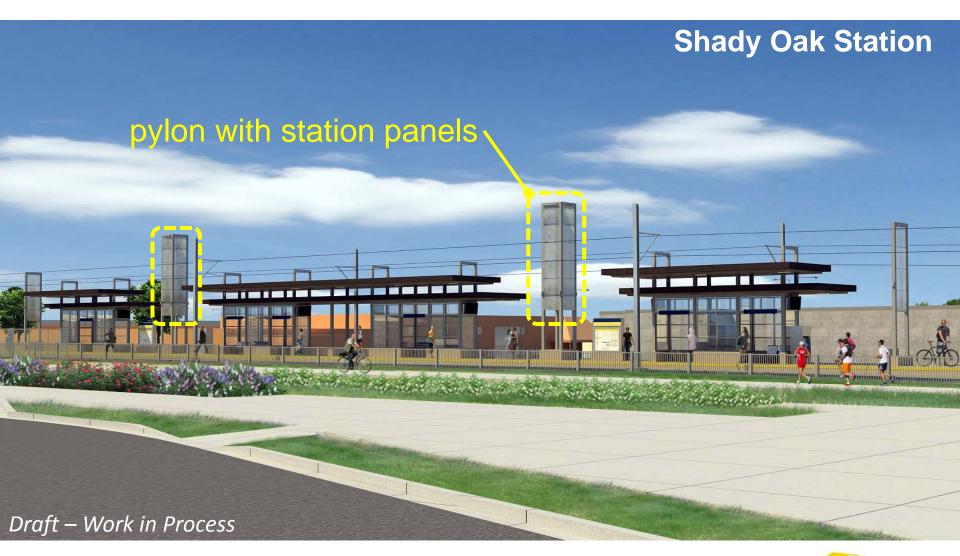

Station Panels

Station Panels

Station Panels

- Panels at all stations except SouthWest Station, which is within a parking structure
- Size and number of panels depends on station design
 - Pylon height is 28 ft approx.
 - Wicket height is 16 or 18 ft approx. depending on station design
- Panel materials include:
 - Stainless steel mesh with etched pattern
 - Laser/Jet cut steel plate (painted)
- Panel design theme based on station context

Station Panel Themes: Input

- Station design open houses in spring 2015
- TPAC/CAC/BAC
- Other advisory and neighborhood committees
 - Harrison Neighborhood Association
 - SWLRT Kenilworth Landscape Design Committee
 - St. Louis Park Station Design Committee
- City staff
 - Marketing/community branding themes
 - Historical themes

Station Panel Materials

Etched Stainless Mesh

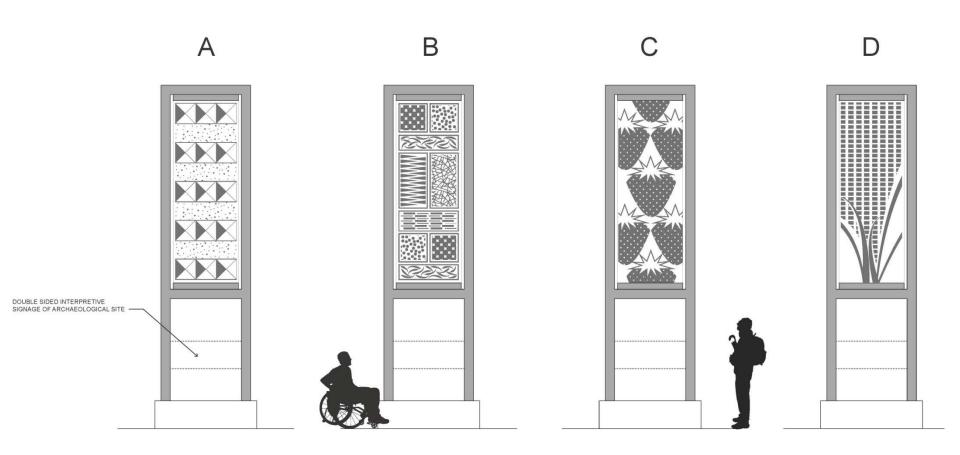

Laser/Jet Cut Steel Plate (painted)

Royalston Ave/Farmers Market Station Panels

- 4 wickets on each platform (8 total)
- 4 unique panel designs
- Etched stainless steel mesh

Royalston Ave/Farmers Market Station Panels

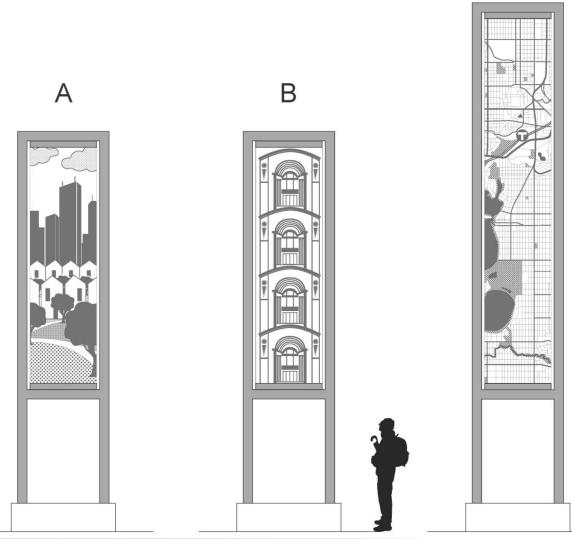

Bassett Creek Valley Station Panels

- 2 wickets,1 pylon
- 3 unique panel designs
- Etched stainless steel mesh

Bassett Creek Valley Station Panels

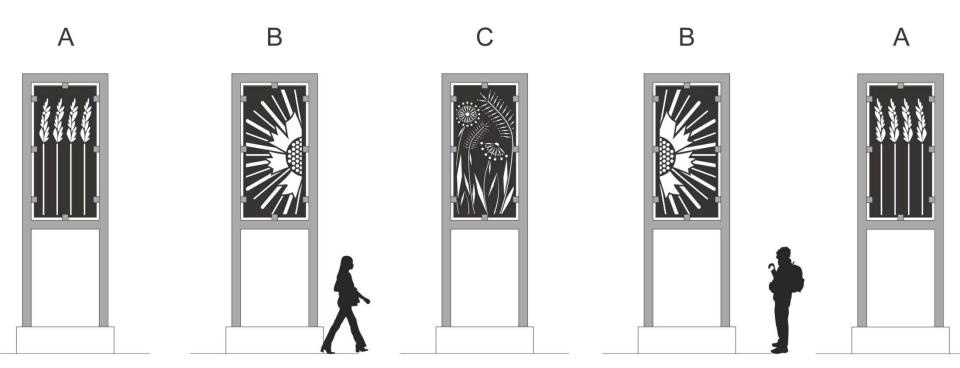

Bryn Mawr Station Panels

- 5 wickets
- 3 unique panel designs
- Laser/jet cut steel plate (painted)

Bryn Mawr Station Panels

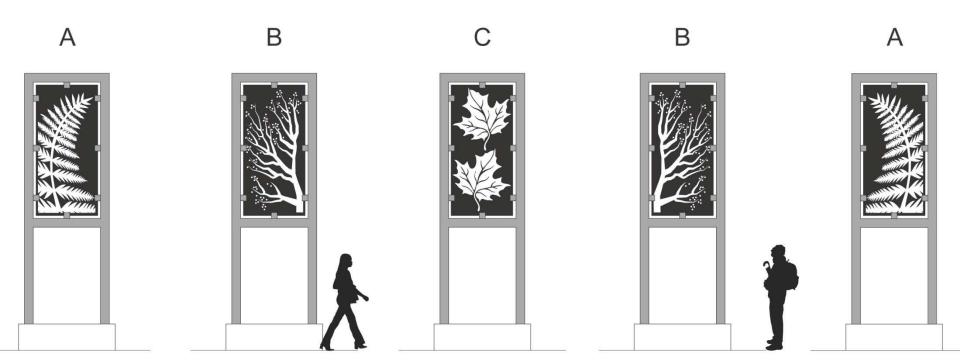

West 21st Street Station Panels

- 5 wickets
- 3 unique panel designs
- Laser/jet cut steel plate (painted)

West 21st Street Station Panels

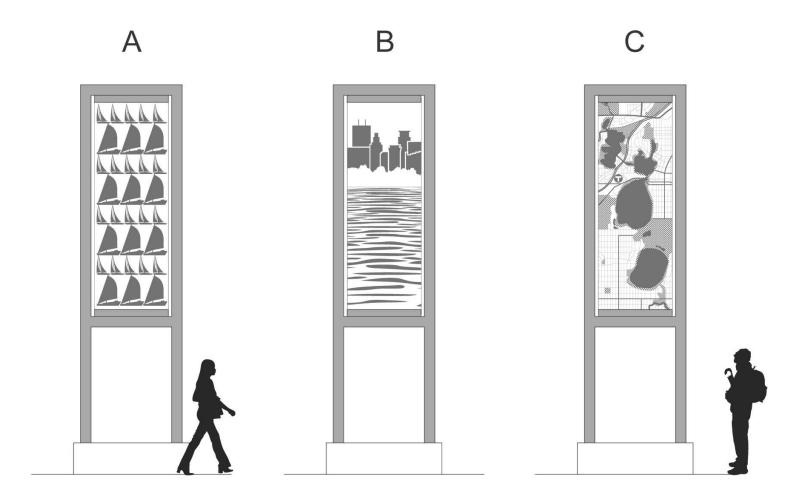

West Lake Street Station Panels

- 3 wickets
- 3 unique panel designs
- Etched stainless steel mesh

West Lake Street Station Panels

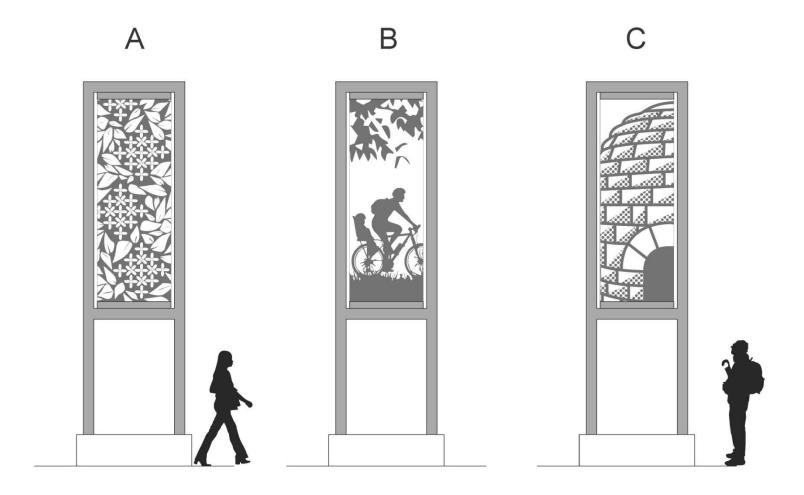

Beltline Boulevard Station Panels

- 3 wickets
- 3 unique panel designs
- Etched stainless steel mesh

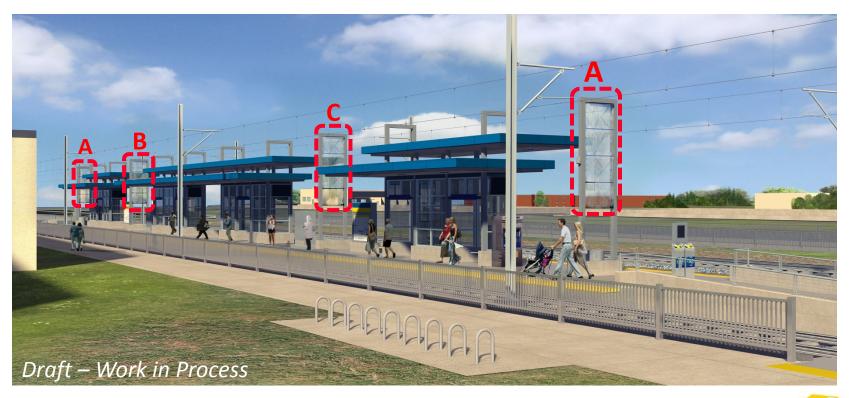

Beltline Boulevard Station Panels

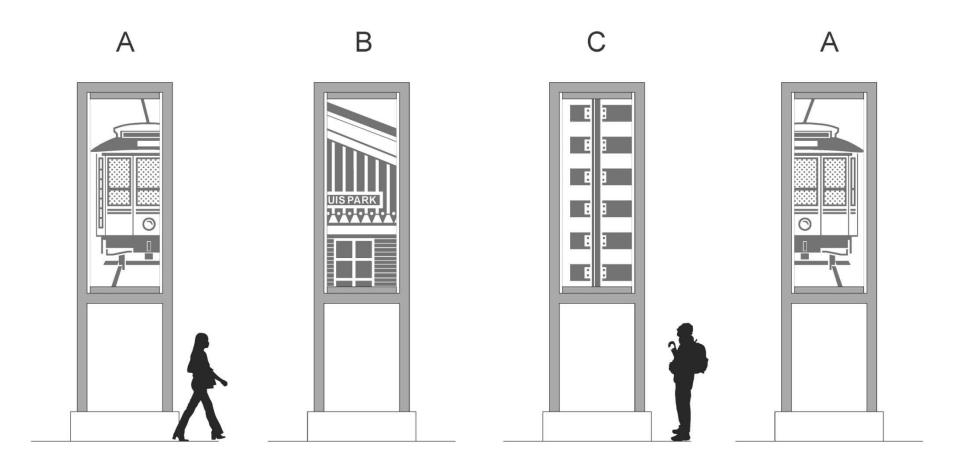

Wooddale Avenue Station Panels

- 4 wickets
- 3 unique panel designs
- Etched stainless steel mesh

Wooddale Avenue Station Panels

Louisiana Avenue Station Panels

- 2 pylons
- 2 unique panel designs
- Etched stainless steel mesh

Louisiana Avenue Station Panels

Draft – Work in Process

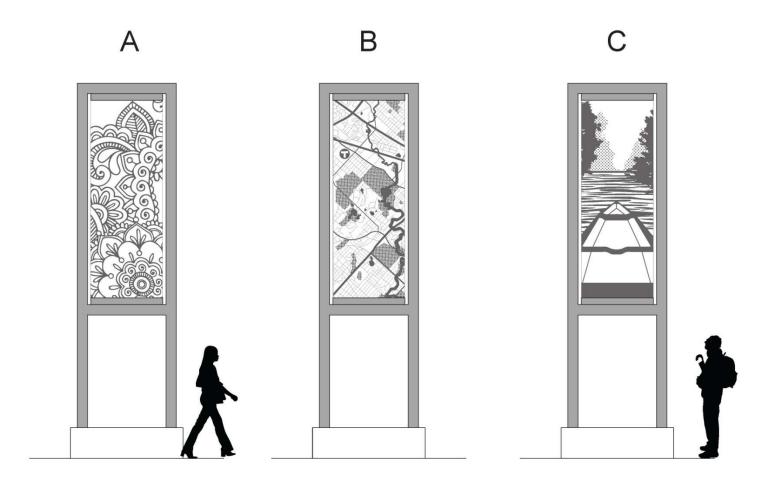

Blake Road Station Panels

- 4 wickets
- 3 unique panel designs
- Etched stainless steel mesh

Blake Road Station Panels

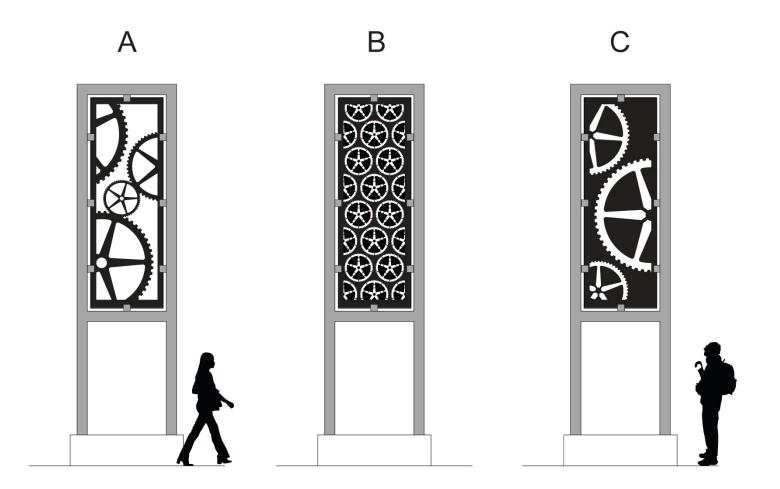

Downtown Hopkins Station Panels

- 3 wickets
- 3 unique panel designs
- Laser/jet cut steel plate (painted)

Downtown Hopkins Station Panels

Shady Oak Station Panels

- 2 pylons
- 2 unique panel designs
- Etched stainless steel mesh

Shady Oak Station Panels

A

В

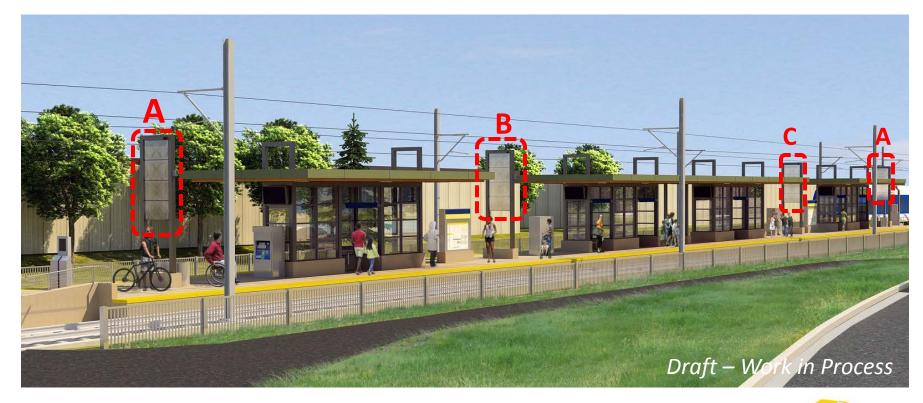

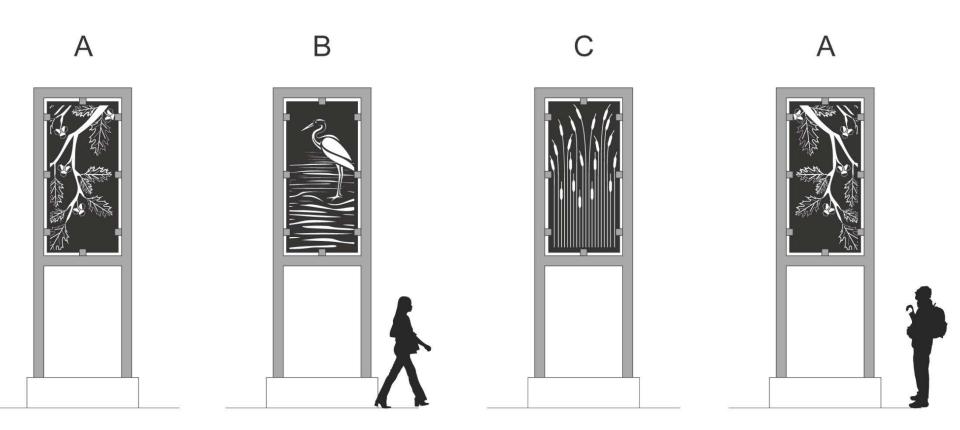

Draft – Work in Process

Opus Station Panels

- 4 wickets
- 3 unique panel designs
- Laser/jet cut steel plate (painted)

Opus Station Panels

City West Station Panels

- 2 pylons
- 2 unique panel designs
- Etched stainless steel mesh

City West Station Panels

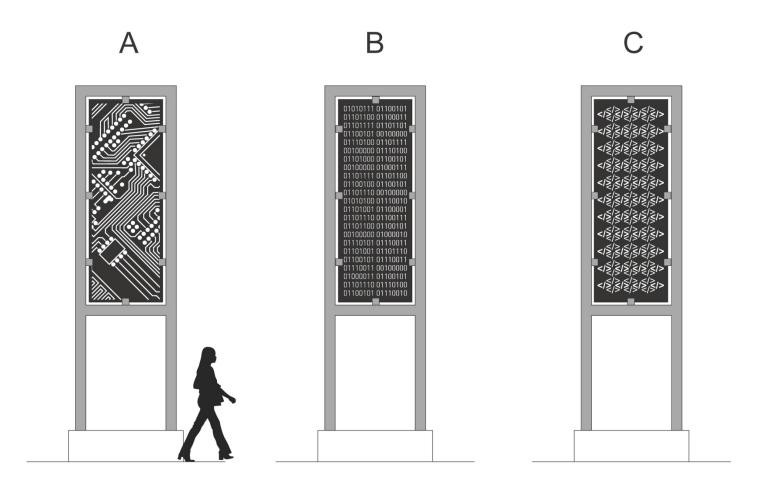

Golden Triangle Station Panels

- 3 wickets
- 3 unique panel designs
- Etched stainless steel mesh

Golden Triangle Station Panels
